Airman's Guide

Vol. 4

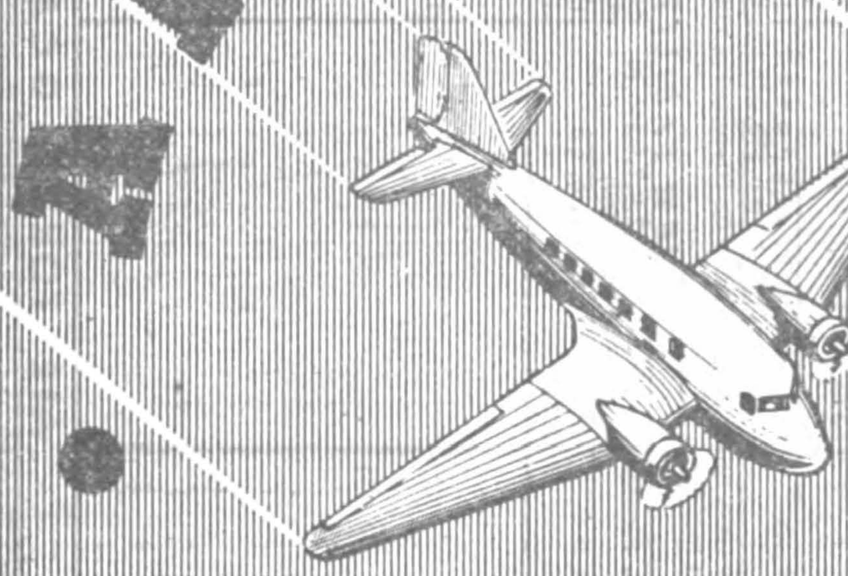
1949-50

Sept. 27-Mar. 14

OCT 3 - 1949
LIBRARY

PLEASE POST!

CHECK THE DIRECTORY OF AIRPORTS:
All abandoned airports, reported abandoned airports, or airports closed because of construction, are cited as such in both the Directory of Airports and Notices to Airmen. After October 1, 1949, however, such airports will be cited in only the Directory of Airports.



AIRMAN'S GUIDE

DIRECTORY OF AIRPORTS

RADIO FACILITY DATA

NOTICES TO AIRMEN

VOL. 4, NO. 14 . . . SEPTEMBER 27, 1949

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

→ -New or revised data.

(A) = Air Force Facility. G.P. = Glide Path. L7=Hi-intensity approach lgts. (W) = Without voice. (&) = On **test basis, unmonitored and not to be used for navigation. MMK's, OMK's are at the same** locations **as the middle and outer markers unless** otherwise specified. →New **or revised data.**

(9-27-49)

AIR NAVIGATION RADIO AIDS

VHF RANGES: *"Non-commissioned" VHF omni-directional ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use" page 58

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met.

NOTE: Category II indicates by parenthetical (2). Category III = If facility monitored solely through use of automatic visual course monitor and automatic transfer unit. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility
(N) = Navy facility
(P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180", indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)
FMHW . . Non-directional radio beacon when combined with fan marker
GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . . Instrument Landing System (voice on localizer channel)
IM . . . VHF boundary marker
→ L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range
MH . . . Non-directional radio beacon (homing) power less than 50 watts
ML . . . Range (loop radiators), power less than 50 watts
MM . . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . . Additional VHF voice feature on other than range frequency. ←
VAR . . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

NOTE: (1) All C.A.A. communication stations guard 3105, 4495, 3117.5[1] kc., and 122.1 mc, except in a few isolated cases. C.A.A. communication stations on domestic international aerodromes, in addition to the above guard 6210 kc. 3117.5 kc is not guarded by those stations operating in conjunction with C.A.A. towers.

[1] 3117.5 kc, aircarrier frequency, will be replaced by 126.7 mc, new air carrier enroute frequency, on Nov. 1, 1949. Many C.A.A. stations are already guarding this frequency.

(2) All C.A.A. stations guard and transmit on 140.58 mc. (which is a replacement for 116.1mc) They also transmit on 111.1mc, as indicated in the following tabulation.

(3) All C.A.A. towers guard 3105, 4495, 3117.5 kc, and 122.5 mc. Caution: Navy towers generally operate daylight hours only.

(4) Range courses are magnetic in-bearings.

****
* Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected. *
****

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

(A) City and Airport Name (with C,I, M, MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields,respectively.

(P) City and Airport Name - Civil airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

★ City and Airport Name - C.A.A. Int. Field, open to mil acft.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS

3. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	-US Air Force	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
CG	-Coast Guard	MG	-Misc. Govt.	P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sealevel. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

FIELD CLASS

In this column are included the length and surfacing of the longest runway and the lighting and servicing facilities available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - rnwy or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
Note: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights. (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

(Any S combination in parenthesis indicates only part time or irregular attendant.)

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

FUEL OCTANE

Civil Fuel:
F1: 73/80 oct.
F2: 73/80, 91 oct.
F3: 73/80, 91, 100 oct.
NOTE: If only 91 or 100 octane available, this octane cited, and not coded.

Army and Navy Fuel:
A+: 145 oct.
A : 100 oct.
B : 91 oct.
C : 73/80 oct.
J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the acft is assigned.

(c) "CIVIL SVCG ONLY." indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) STATUS UNKNOWN: These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) ABANDONED: Reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for revenue producing aircraft.

(g) "+" indicates additional (non-temporary) data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

NOTES

1. ← Notam data revising previous issues.
2. "*Effingham, 10, STL-IND" in City and Airport Name column indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
3. SCHEDULES AIRLINE STOP airport names are capitalized.
4. PRIVATE AIRPORTS: offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
5. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
   Note: "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
6. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force Base
CGAS - Coast Guard Air Station

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded to the same address for submittal to Chief of Staff, U.S. Air Force, as required. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations offices is invited to Air Force Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to Air Force Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

PILOT USE OF PLAN 62 INTERPHONE CIRCUITS TO FLIGHT SERVICE: The interphone network of the Military Flight Service Communications System has been extended to include, in addition to active Air Force Bases, Naval Air Stations and Coast Guard Air Stations, most airfields at which are located Air Reserve, National Guard or U.S. Air Force Servicing Detachments. Pilots should, when closing or filing flight plans with Flight Service Centers, check the availability of the interphone facility before placing long distance telephone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Effective September 1, 1949, change in use of VHF frequencies for military aircraft within the continental United States was effected as follows:

(a) Frequency 140.58 mc is redesignated as the communication channel between military aircraft and CAA airway stations to replace frequency 116.1 mc.

(b) The international emergency frequency 121.50 replaced military emergency frequency 140.58 mc.

Effective with this change, 116.1 mc is no longer guarded or transmitted by CAA communications or military airway stations.

Standard VHF crystallizations are as follows:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58	Guard-D...140.58	Guard-D...140.58	CAA Airways (Range Stations)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Military Emergency (a) USAF GCA (IFR or emergency)
E...( )	4-E...( )	4...118.1	USAF and Navy-Tactical or as required. USCG -- international airdrome control towers
F...( )	5-F...( )	5...143.28	USAF and Navy - Tactical or as required. USCG - general communications.
G...137.70	6-G...( )	6 ...143.64	USAF and USCG GCA. Navy tactical freq.
H...134.1	7-H...142.02	7...142.02	GCA
	8..... 134.64	8...134.1	GCA
	9..... 126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR Ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on a secondary basis.

* Headquarters, U.S. Air Force has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 mc authorized as interim frequency pending receipt of crystals. 132.3 mc - in 4 channel set-ups 142.02 and 126.18 mc may be substituted in accordance with operational requirements

---

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to page 22 of the CAA's Flight Information Manual, Volume 4, No. 1, dated August 1, 1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by the CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to U.S. Air Force aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the

intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

✓ UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by the following criteria:

(a) From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

(b) From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

(c) Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with Air Force Letter 55-6 and above criteria.

✓ U.S.A.F. and NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at Air Force installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all U.S.A.F. GCA installations will for the next 30 to 60 days maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by U.S.A.F. aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations channel "A" (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations.

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) Correct page 24, by showing Rockcliffe VHF D/F also transmitting and guarding 137.7 mc.; Hours of operation: 0730-1530 Monday thru Friday, 0730-1100 Saturday, other hours on request.

(2) Correct page 52, by deleting Control Tower VHF Channel B(9) under Scott AFB, Ill.

NOTE: See page 60 for additional A.N. 08-15-1 Corrections and Amendments.

✓ CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: Correct Instrument Approach Procedures as follows:

(1) Dothan, Ala.: Change Initial approach altitudes to SW-1500' (Int E crs CEW), NW-1600' (Int E crs MXF).

(2) Joliet, Ill.: Change Initial approach altitude to NE-2300' (Int W crs CHI), W-2000' (Int N crs PIA).

(3) Houston, Texas: Change Initial approach altitude to SW-1500' (Int SW crs RIM); add Min. alt. authorized after passing marker or int: NW-1300' Houston FM.

(4) Palmdale, Calif.: Change Initial approach altitude to SW-9000' (EHA range sta); Missed approach procedure: Make 180° magnetic right turn (North), climb to 6000' on NE crs within 16 miles.

(5) Wichita Falls, Texas: Change Missed approach procedure to Climb to 2500' on NW crs within 25 mi or (when directed by ATC) turn right and climb to 2500' on NE crs within 25 miles.

(6) Yuma, Ariz.: Change Missed approach procedure: Climb to 3500' on S crs within 25 miles.

(7) Great Falls AFB, Mont.: Correct Missed approach procedure noted at bottom of procedure to read: Climb to 5500' on NE crs within 25 miles.

(8) McChord AFB, Wash. (Procedure No. 2): Following instrument letdown procedure authorized when Fort Lewis Firing Range is inactive: Procedure turn: S side SW crs within 15 mi-2000', 25 mi-3500'. Low cone: 1000'; Ceiling over airport: 1000'; Missed approach procedure: Climb to 2500' on NW crs within 25 mi and contact McChord Twr for further instructions.

(9) McChord AFB, Wash. (Procedure No. 1): Change Missed approach procedure to Climb to 2500' on NW crs within 25 mi and contact McChord Twr for further instructions.

(10) Robins AFB (Macon), Ga.: Change Minimum alt to: 800'; Ceiling over airport: 505'.

SEE PAGES 59 and 60 FOR ADDITIONAL A.F. SPECIAL NOTICES.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

✓ NAVY and U.S.A.F. GCA CHANNELS: See item under Air Force Special Notices, entitled, "U.S.A.F. and Navy GCA Channels":

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the otherhand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious trans-

mission to the aeronautical public, and the data may be checked from an engineering standpoint and for standarization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention, W-155, C.A.A., Washington 25,D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents and individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control". are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D.C.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400 feet and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT. Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, and Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

NOTE: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR Airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR Airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

✓ CAA AIRWAY COMMUNICATIONS STATIONS TO GUARD 126.7 MC INSTEAD OF 3117.5 KC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on November 1, 1949. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started. By November 1st, when the watch on 3117.5 kc is discontinued, all CAA stations will be guarding 126.7 mc.

NOTE: Effective November 1, 1949, CAA control towers will guard 3117.5 kc only on request. Guard will be established within ten minutes after request received.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA airway communications stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

✓ CAA AIRWAY COMMUNICATIONS STATIONS DISCONTINUE USE OF 116.1 MC. Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. After September 1, 1949, military stations and aircraft will use 121.5 mc, the international VHF emergency frequency, for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

OMNI-RANGE USE: The effectiveness of the omni-range (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflection and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

SEATTLE, OAKLAND, AND HONOLULU FLIGHT INFORMATION REGION BOUNDARY CHANGES: On October 1, 1949, the following re-arrangement of the boundaries of the Seattle, Oakland and Honolulu Flight Information Regions will become effective: (a) The southern boundary of the Seattle F.I.R. to run from the West Coast of the United States along 40°00'N, to 130°00'W; thence to 35°50'N, 138°00'W; thence to 40°00'N, 142°00'W; thence along 40°00'N to 160°00'W. (b) The Oakland-Honolulu boundary to be relocated to 138°00'W.

ATC BOUNDARY REVISION: Effective October 15, 1949, the control boundaries between the New York and Washington Areas on Green Airway No. 5 and Red Airway No. 77 will be relocated to a point five miles NE of the Dover, Delaware VAR Range Station.

✓ DESIGNATION OF NON-COMPULSORY REPORTING POINTS: (1) Effective concurrently with the realignment of the E course of Allentown, Pa. (approximately October 3, 1949), the intersection of the E course of Allentown, Pa. and the SW crs of Newark, N.J., will be designated as a Non-Compulsory Reporting Point and named: NEW BRUNSWICK.

(2) The intersection of the SW course of Norfolk, Va. and the NW course of Weeksville, N.C. has been designated a Non-Compulsory Reporting Point and named: CORAPEAKE.

(9-27-49)

NON-STANDARD HOLDING PATTERNS: Effective October 1, 1949, the Metuchen Non-Standard Holding Pattern is being discontinued and abandoned, and lieu thereof aircraft will be held at the Linden "H" facility as follows: "Between Linden and a point two minutes SW on the W side of the SW course of the Newark radio range, with left turns".

(2) Effective October 15, 1949, Non-Standard Holding Pattern will be established: Fresno ILS Middle Marker: Direction from holding point: SE; Direction of turn: Left on S side of SE lclzr course; Time: 2 minutes; Min. altitude: 1700'.

(3) The following Non-Standard Holding Patterns have been established:

(a) Santa Barbara (LF); Direction from holding point: E; Direction of turn: Left on S side of E course; Time: 2 minutes; Min. alt.: 2500' on top, daylight hours only.

(b) Santa Barbara (LF); Direction from holding point: E; Direction of turn: Left on S side of E course; Time: 2 minutes; Minimum alt.: 5000' on top, hours of darkness.

(c) Santa Barbara (VAR): Direction from holding point: SE; Direction of turn: Left on S side of SE course; Time: 2 minutes; Min. alt.: 5000', day and night.

NOTE: This corrects Airman's Guide, Vol. 4, No. 13, dated September 13, 1949.

(4) The following Non-Standard Holding Patterns have been cancelled:

(a) Atlanta Area: Chattanooga Range; Daisy FM; Greenville Range (N crs only).

(b) Chicago Area: Aurora Int; Chicago Kedzie compass locator (back course); Elmhurst Int; Goshen Range; Momence Int; Moline ILS Outer Marker; Milwaukee ILS Outer Marker; South Bend ILS Outer Marker; Ft. Wayne ILS Outer Marker; Mundelein Int.

(c) Denver Area: Cheyenne Range (NW course only).

(d) Detroit Area: Manchester Int; Willow Run ILS Outer Marker.

(e) Kansas City Area: Bair Int; Excelsior Springs Int; Weston Int.

(f) Oakland Area: San Francisco Range; Belmont FM; Hayward H facility.

(g) St. Louis Area: Waterloo Int.

AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Instrument Approach Chart (AL-365), Salt Lake City Municipal Airport No. 1, dated July 27, 1949, by deleting Beacon Site O-A, Emigration Butte, Utah on the Salt Lake-Omaha Airway on the approach side of the chart. (This beacon has been decommissioned).

(2) Correct Flight Information Manual, Vol. 4, No. 1, dated August 1, 1949, as follows:

(a) Page 30, Fresno, Calif., Class: CAA, Phone No.: 5-6426;
" " WB, " 5-5593 and 5-6314

(b) Page 33, Add: Watertown, N.Y., Class: CAA, Phone No.: Dexter 67.

(c) Page 84, Correct spelling of Simmons-Nott, New Bern, N.C.

DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective October 1, 1949, unless otherwise advised:

AMENDMENT NO. 12

(1) SAN MIGUEL ISLAND, CALIF.- Area is amended by changing description to read: N boundary: lat 34-05-30; E boundary: long. 120-16; S boundary: lat 33-57; W boundary: long. 120-28-30.

(2) CHASSAHOWITZKA BAY, FLA. - Area is amended by changing description to read: Beginning at lat 28-53, long. 82-45; due S to lat 28-43; due W to a point 3 nautical miles from the shoreline at long. 82-47; northerly paralleling the shoreline at a distance of 3 nautical miles to lat 28-53, long. 82-46-45; due E to point of beginning.

(3) CHINCOTEAGUE INLET, VA. - Area is amended by changing description to read: Beginning at lat 37-56-45, long. 75-27-30; SE to a point 3 nautical miles from the shoreline at lat 37-51-25, long. 75-16-50; southerly 3 nautical miles from and parallel to the shoreline to lat 37-35, long. 75-32-20; due W to long. 75-37; to lat 37-45, long. 75-32-30; due N to lat 37-51; to point of beginning.

(4) YAKIMA, WASH. - Area is amended as follows: Description: Beginning at lat 46-51 long. 119-58; southerly following the W shore of the Columbia River to lat 46-39, long. 119-55-30; due S to lat 46-33; due W to long. 120-13-45; NW to lat 46-39, long. 120-26-38; due N to lat 46-43; NNE to lat 46-51, long. 120-21-30; due E to long. 120-16-30; NNE to lat 46-54-30, long. 120-15; clockwise along the arc of a circle with a radius of 12 mi. centered at lat 46-44-45, long. 120-20 to lat 46-51, long 120-08-30; due E to point of beginning. Altitudes: Unlimited. Time: Continuous. Using Agency: 6th Army, San Francisco, Calif.

(5) ATTU ISLAND, ALASKA - Listings are amended by changing the descriptions to read: (a) Beginning at lat 53-30N, long. 174-00E; S to lat 53-10N; W to long. 173-35E; N to lat 53-30N; E to point of beginning. (Center of area: lat 53-20N, long. 173-47-15E). (b) Beginning at lat 52-40N, long. 173-10E; S to lat 52-30N; W to long. 172-55E; N to lat 52-40N; E to point of beginning. (Center of area: lat 52-34-15N, long. 173-02E).

DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, COMPULSORY REPORTING POINTS, CONTROL AREAS, CONTROL AREA EXTENSIONS, AND CONTROL ZONES:

See pages 73 and 74 for amendments.

ADDITIONAL AIR FORCE SPECIAL NOTICES

AIRPORT AND INTERMEDIATE ROTATING LIGHTS: Unfamiliarity with the types and coding of rotating lights used to denote airports and intermediate fields has caused accidents. Rotating lights on civil airports and intermediate fields are of a different type and have several different codings than those used on military fields. Basically all civil airport rotating lights are flashing white lights with alternating green flashes. All military rotating lights are of the double peak or split beam type giving two white flashes between alternating

green flashes. All pilots should familiarize themselves with the details of types and coding of rotating lights which are contained in the Flight Information Manual, Volume 4, No. 1, dated August 1, 1949.

✓ CANADIAN STATION RETENTION OF 116.1 MC: All Canadian stations listed in A.N. 08-15-1 will retain frequency 116.1 mc until further notice. Frequency changeover of international emergency frequency 121.5 mc to replace present military emergency frequency 140.58 mc will not be accomplished until approximately November 1, 1949.

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1:

(1) Correct page 8, by showing Rivers, Man. control tower hours of operation: 0900-2100 daily and on 1 hr request. RCAF gnd/air VUJ oper 0900-2100 Mon. thru Sat.; Winnipeg RCAF gnd/air CHP operating on 4400, 6240 kc continuously, 3202.5 kc operating 2200-0700 daily.

(2) Correct page 24, by showing Rockcliffe RCAF gnd/air CHT operating 0700-2300 Monday thru Saturday and on request Sunday, VHF D/F on 140.58 mc, operates 0700-1100, 1230-1600 Monday thru Friday and on request; St. Hubert RCAF, P.Q. control tower transmitting on 212 kc, 116.1,126.18 and 140.58 mc.

(3) Correct page 26, by showing Dartmouth, N.S. control tower transmitting on 278 kc, 126.18 mc, and 140.58 mc on request; guarding 3105,3117.5,6210 kc, 126.18 mc, and 140.58 mc on request; Greenwood, N.S., Gnd/air station CGL hours of operation: 0845-1645 Monday thru Friday and on request. VHF/DF operates on 1 hr request during normal working hours.

(4) Correct page 38, by showing Chatham, N.B. control tower transmitting on 278 kc, 126.18 and 140.58 mc cont., guarding 3105,6210 kc, 126.18 and 140.58 mc.; Downsview control tower operating from 0730-1530 daily.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam service gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Stations Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - new or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE - Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: SPECIAL NOTICE: The address of the CAA D.A.E. is Old Post Office Bldg., Montgomery, Ala.

BIRMINGHAM,ARPT: 2-way rdo rqrd ngts, rcvr days. (9-24)

CLANTON-GRAGG ARPT, SITE 27, MEM-TPA: Ctn, const. Equip. on fld. Graded areas hazardous. (9-9)

★CRAIG AFB (SELMA)-TOWER: USAF twr transmits on 219 kc, 126.18,140.58,121.5 mc; guards 3105,4495 kc, 140.58,121.5,126.18 mc. (9-16)

EUTAW ARPT: NW/SE strip hazardous, unusable. Use NE/SW strip only. (9-9)

FT. MORGAN AIRFIELD: New fld under const approx lat 30-13-30, long. 88-00-30. Unusable. (6-6)

CHINCOTEAGUE NAAS: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders. Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous opers. (8-18)
DAHLGREN: A Ctld Firing Area has been estab approx 18 mi ESE over the Potomac Riv for use by Dahlgren Naval Proving Grounds. Area is described as follows: Beginning at lat 38-12-20, long. 76-34-40; SW to lat 38-09-00, long. 76-37-00, WNW to lat 38-09-55, long. 76-44-00; NE to lat 38-11-10, long. 76-42-20; NNW to lat 38-13-25, long. 76-42-50; NNW to lat 38-14-40, long. 76-43-25; ESE to point of beginning. Adequate notice will be given in advance of firing activity.
DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri. Official flgts must be cleared thru one of the following: NAS: Anacostia, D. C.; Patuxent River, Md.; Norfolk, Va; Quonset Point, R. I.; Lakehurst, N. J. CGAS: Cape May, N. J. NAF: Inyokern, Calif.; Torpedo Stn, Newport, R. I.; Naval Acft Factory, Philadelphia, Pa. MCAS: Cherry Point, N. C.; Quantico, Va. AFB: Eglin, Valpariso, Fla.; Langley, Hampton, Va.; Wright, Dayton, Ohio. Proving Ground: Aberdeen, Md. (5-5)
The importance of avoiding the Dahlgren danger area is emphasized by several near accidents recently during periods of danger area activation. Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.
DANVILLE ARPT: Const on hangar aprons, N and S taxi strips, days. Mrkd ngts. Ctn tkying this area. (8-5)
EMPORIA ARPT: Bcn inop. (8-8)
FALLS CHURCH ARPT: Equip on fld. (8-15)
FREDERICKSBURG-SHANNON ARPT: Clsd Sept 10 to 30, Fredericksburg Fair. (9-6)
GALAX ARPT: Equip on fld. Ctn taxying off strips. (8-8)
HOPEWELL ARPT: E/W, 9-27, lndg strips clsd. Const. (8-29)
LANGLEY AFB (HAMPTON)-RADIO: USAF VHF/DF inop. USAF LF rng S course swinging 5°. (9-23)
LANGLEY AFB (HAMPTON): Const apch ends of all rnwys. (8-31)
★LYNCHBURG-RADIO: August 30, 1949, Oak Grove FM on SE course was comm. Ident: 2 dashes. Elev 940' MSL. Lctd 6.6 mi from rng stn at lat 37-16-12, long. 79-10-38. (9-21)
MOUNT VERNON: See special notice under District of Columbia.
NEWPORT NEWS-PATRICK HENRY: Const ENE/WSW rnwy. Equip crossing S end NNE/SSW rnwy. (8-8)
PORTSMOUTH ARPT: Ctn, equip on strips, const. (9-8)
PRICE MT. BCN SITE 37, BRR-DCA: 190' drilling derrick lctd atop Price Mt. 1 mi WSW. Lgtd by clear lgts. (7-12)
RICHMOND-BYRD ARPT: Ctn, const N/S taxiway. Use hard surface areas only. Grass areas unsafe for taxying or parking. (9-12) No fuel avail for trans mil acft. (9-7)
ROANOKE-RADIO: VHF omnirng on 114.2 mc shut down - relctn. (7-1)
ROANOKE-WOODRUM ARPT: Equip adj all rnwys. (8-8)
WAVERLY ARPT: 2500' NE end NE/SW strip unusable. Usable portion of strip mrkd. (7-2)
[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is CAA Bldg., Boeing Field, Seattle 8, Washington.
SPECIAL NOTICE: Unmrkd p-lines extending across coves in Puget Sound area and lakes in Western Washington. (9-12)
BELLINGHAM-RADIO: LF rng monitor sys oper on test basis. Spurious signals may be emitted. (4-26) VHF omnirng 294° radial, which lies over Vancouver B. C., has a usable dist. of 20 mi acct course roughness at the lowest instr alt. of 1500' MSL. (8-6)
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate, must register at CAA Comms Bldg. (2-3)
BOTHELL-KENMORE ARPT: Acft parked 40' from both sides of strip. (9-7)
**BREWSTER ARPT: New fld: Lat 48-06-30, long. 119-46-15. (6-22)
**CHELAN-EDDIE'S SEAPLANE BASE: New base. 0.5 W on Lake Chelan at lat 47-50-30, long. 120-01-45. Elev. 1079'. allway, 30,000'. 80 oct., intermittently. Beach, crash boat. (5-13)
[redacted]: COLLEGE PLACE-MARTIN FLD: Const, main rnwy. Use sod strip on S. (7-14)
**CURLEW ARPT: New fld: Lat 48-53-00, long. 118-36-30. (5-23)
EASTSOUND-ORCAS ISLAND ARPT: Clsd (const)-Hazardous. (9-9)
ELLENSBURG-RADIO: About Sept 30, S course of LF rng will be realigned from 342° to 346°. (9-23)
EVERETT-PAINE ARPT: N 1500' E side of N/S rnwy will be ditched 15' inside of present lgtg fixtures, flagged days, lgts nights. (8-12)
**GRAHAM-STURVE'S PORT ARPT: Correct: Lat 47-04-15, long. 122-18-00. (9-8)
HOQUIAM-MOONE ISLAND ARPT: Const along side ramp and adj to E end Rnwy 6. (5-19)
ISSAQUAH, BCN SITE 1, SEA-HLN: Inop. (7-13)
★McCHORD AFB (TACOMA)-RADIO: Mil Arwys Stn operates on VHF Channel C-D and 132.3 mc; HF voice 4765, 2862 kc; HF CW freq 4595, 8200, 8280 kc. (9-16)
METALINE FALLS-SULLIVAN ARPT: Circle fld to stop auto tfc. (1-26)
MT. CATHERINE, BCN SITE 4, SEA-HLN: Inop. (7-12)
MT. VERNON OLF: Clsd to all acft except those permitted by the C. O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (3-4)
**PORT TOWNSEND SEAPLANE BASE: Ramp, haul-out. Comb oper with arpt. Ctn: do not lnd during strong S winds. (3-23)
PROSSER ARPT: Gliding and soaring over fld and vcnty. Use rnwys only. Equip on fld. (8-24)
QUILCENE-MOSIER ARPT: Clsd (const). (3-23)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle, approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an inst weighing approx 1- 1/2 lbs suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (1-31)
SEATTLE-RADIO: Auto. rng monitor sys placed in oper on LF rng on exper basis. Spurious signals should be disregarded. (3-23) VHF omnirng shut down Sept 16, 1949-relctn. (9-16)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. Avoid flagged area E side of strip. Equip on fld. N 250' rnwy clsd, const. Temp rng lgts set at edges of rnwy 250' from N end. Usable rnwy 5550'. Const Rnwy 13-31, daylgt hrs. (8-22)
SEATTLE NAS: Single-eng acft will enter the tfc pat over Kirkland at 1000', at which point lndg instructions will be reqd from the twr. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-16)
SEATTLE-SEATTLE-TACOMA ARPT: Equip on fld. (5-25)
SNOHOMISH ARPT: WNW/ESE strip only 1320' long with dirt piles adj to WNW end. (7-1)
SPOKANE-RADIO: VHF omnirng flgt-checked Sept 24, oper normal. (9-25)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with free swinging tetrahedron. When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. (7-12)
TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (4-12)
★WALLA WALLA-RADIO: Mil Arwys stn oper on VHF Channels C-D, 132.3 mc; HF voice 4765 and 2862 kc. (9-12)
WALLA WALLA-CITY CO. ARPT: Rnwy 7-25 clsd ngts. Ctn, const lndg area days. (7-8)
WENATCHEE: Unmrkd p-line crosses Columbia Riv 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (5-18)
**WENATCHEE SEAPLANE BASE: Delete fuel. (5-18)
WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)
[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is Kanawha County Court House, Charleston, W. Va.
CHARLESTON-KANAWHA CO. ARPT: Equip SE side Rnwy 5-23. Equip crossing Rnwy 15-33 days. Obsts mrkd day, ngt. (7-25)
[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is 638

(9-27-49)

WISCONSIN: State St., Madison 3, Wis.
CABLE UNION ARPT: New E/W strip under const. Old strips usable with ctn. (5-23)
DRUMMOND-SORENSEN ARPT: Clsd (const). (3-1)
GRANTSBURG-RADIO: Temporarily, scheduled bdcasts made on the hr and 30 min past the hr. Teletype services will be inaugurated at a later date. (8-2)
★GREEN BAY-RADIO: INSAC for VHF omnirng comm Sept. 19, 1949. Transmitting: 140.58, 111.1 mc; gds, 121.5, 122.1, 126.7, 140.58 mc; 3117.5 kc. Class: VORW-TV. (9-19)
GREEN BAY-AUSTIN STRAUBEL ARPT: Effective Oct 1, lctn ident will be assigned "GRB". (9-20)
LAKE TOMAHAWK-DALHUN'S ARPT: Clsd (const). (5-12)
MADISON ARPT: Equip on fld days. Sod unsafe. (8-1)
MILWAUKEE-GENERAL MITCHELL ARPT-TOWER: CAA ILS glide path unreliable. (9-26)
FLD: Full length of Rnwy 13-31 open days and N from green rng lgts at ngt. Rnwy 18-36 clsd const, except 2600' N end open days only. Taxiway from Rnwy 1-19 to Rnwy 6 clsd. Rnwy 7-25 clsd, hi-tension obsts. Rnwy 9-27 not to be used at any time with wind under 8 mph except in emerg or upon demand by pilot for definite reason, or take-offs in inst weather to expedite tfc. Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Army twr lctd W side clsd and should not be confused with CAA twr lctd N side. (9-26)
PORT WING ARPT: NE/SW rnwy under const. (9-9)
RHINELANDER-ONEIDA ARPT: Ctn, equip on SW apch. (9-9)
WASHINGTON ISLAND ARPT: Clsd (const). (5-31)
WAUSAU-ALEXANDER ARPT: Clsd (const). (6-1)
WAUTOMA ARPT: Const, ctn on E/W strip. (6-17)
WYOMING: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is Stapleton Airfield, Denver 7, Colo.
AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (8-7)
CASPER-RADIO: VHF omnirng 22° radial course rough beyond approx 35 mi from stn. (7-1)
★CASPER AFB-RADIO: Mil Arwys stn opers on Channels C-D, 132.3 mc, voice. (9-9)
CASPER AFB: All rnwy lgts inop, except on Rnwys 3-21, 12-30. (3-21)
CHEYENNE ARPT: Equip on fld. (5-17)
**DULL CENTER-SHERWIN #1 ARPT: Correct: Lat 43-31-15, long. 104-51-15. (6-8) Irrigation intermittently during summer months and 5" pipe may be across center of strips. When soft or obstd, will be mrkd, then use Sherwin Arpt # 2. (3-31)
**JACKSON ARPT: Correct: Lat 43-36-15, long. 110-44-15. (9-14)
**LARAMIE-BREES ARPT: Correct: Lat 41-18-45, long. 105-40-15. (9-14)
MOORCROFT-RADIO: About Oct 3, 1949 INSAC will be established. Transmitting: 111.1, 140.58 mc. Gds: 3117.5 kc, 122.1, 126.7, 140.58 mc. Teletype service on circuits 8007 and 8184. (9-26)
**PINE BLUFFS, 44, SLC-OMA ARPT: Correct: Lat 41-09-45, long. 104-08-45. (4-12)
RAWLINS ARPT: Use new ENE/WSW and N/S strip only. (8-15)
**RIVERTON ARPT: Correct: Lat 43-03-15, long. 108-27-00. (4-10)
SHERIDAN CO. ARPT: N/S rnwy clsd to acft heavier than DC-3. (7-8)

DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, COMPULSORY REPORTING POINTS, CONTROL AREAS, CONTROL AREA EXTENSIONS, AND CONTROL ZONES:

Effective October 1, 1949, unless otherwise advised, SPECIAL Civil Airways, Control Areas, Control Area Extensions and Compulsory Reporting Points will be amended to read in whole or in part as follows:

AIRWAYS: (1) Red Airway No. 8 (Butler, Pa., to Wilkes-Barre, Pa.). From Butler, Pa non-directional radio beacon via Brookville, Pa., non-directional radio beacon; the intersection of the SW crs of Elmira, N.Y., and the W crs of Williamsport, Pa. . .

(2) Red Airway No. 85 (Dayton, Ohio, to Martinsburg, Pa.). From Dayton, Ohio range station to Mansfield, Ohio, non-directional radio beacon. From Akron, Ohio range station via Butler, Pa. non-directional radio beacon to Altoona, Pa. range station.

(3) Blue Airway No. 2 (Birmingham, Ala. to Erie, Pa.). . . From Elkins, W.Va. radio marker station via Pittsburgh, Pa. range station; Butler, Pa. non-directional radio beacon; the intersection of the E crs of Youngstown, Ohio and the S crs of Erie, Pa., to Erie, Pa. range station.

(4) Blue Airway No. 12 (The Dalles, Ore. to Ellensburg, Wash.). From The Dalles, Ore. range station via Yakima, Wash. range station; the intersection of the NW crs of Yakima, Wash. and the S crs of Ellensburg, Wash. to Ellensburg, Wash. range station.

COMPULSORY REPORTING POINTS: (1) Red Airway No. 8 (Butler, Pa., to Wilkes-Barre, Pa.)-CAPTION CHANGE.

(2) Red Airway No. 85 (Dayton, Ohio, to Martinsburg, Pa.) Butler, Pa., non-directional radio beacon.

CONTROL AREAS: (1) Red Airway No. 8 (Butler, Pa., to Wilkes-Barre, Pa.)-CAPTION CHANGE.

(2) Red Airway No. 85 (Dayton, Ohio, to Martinsburg, Pa.)-CAPTION CHANGE.

CONTROL AREA EXTENSION: Yakima, Wash.-REVOKED.

Effective October 18, 1949, unless otherwise advised, Civil Airways, Compulsory Reporting Points, Control Areas, Control Area Extensions, and Control Zones will be amended to read in whole or in part as follows:

AIRWAYS: (1) Green Airway No. 5 (Los Angeles, Calif., to Boston, Mass.). Correct Cochise, N.M., to read "Cochise, Ariz.".

(2) Amber Airway No. 1 (U.S, Mexican Border to Nome, Alaska). . . the intersection of the NW course of Bellingham, Wash. and the U.S.-Canadian Border. From the intersection of the SE course of Sitka (Biorka Island), Alaska and the U.S.-Canadian Border via Sitka (Biorka Island), Alaska;. . .

(3) Red Airway No. 29 (Rochester, N.Y., to Baltimore, Md.). .Baltimore, Md., to the intersection of the S course of Baltimore, Md. and the SE course of Brandywine, Md, excluding that portion which lies more than 2 miles E of the S course of Baltimore, Md, between the intersection of the S course of Baltimore, Md. and the southern boundary of Red Airway No. 45 and the intersection of the S course of Baltimore, Md. and the SE course of Washington, D.C. (excluding that portion that overlaps Danger Areas).

(4) Red Airway No. 42 (Milwaukee, Wis., to LaFayette, Ind.) From the intersection of the W course of Milwaukee, Wis and the NW course of Chicago, Ill, to the intersection of the E course of Rockford, Ill. and the NW course of Chicago, Ill. From the intersection of the SE course of Rockford, Ill., and the W course of Goshen, Ind. .

(5) Red Airway No. 55 (Burlington, Iowa to Columbus, Ohio). . . the intersection of the E course of Peoria, Ill. and the SW course of Joliet, Ill. From South Bend, Ind., via Goshen, Ind. . .

(6) Red Airway No. 74 (Louisville, Ky., to Cincinnati, Ohio) is amended by changing the magnetic bearing from 250° magnetic from Covington VOR to 241° magnetic from the Covington VOR radio range.

(7) Blue Airway No. 32 (Pendleton, Ore., to Fairbanks, Alaska). . . the intersection of the S course of Patricia Bay, B.C., and the U.S.-Canadian Border. From the intersection of the NE course of Kenai, Alaska and the W course of Anchorage (Merrill), Alaska to the intersection of the NW course of Anchorage (Merrill), Alaska and the NE course of Kenai, Alaska. From Skwentna, Alaska range station. . .

(8) Blue Airway No. 45 (Lake Charles, La., to Baton,Rouge, La.). From the intersection of the E course of Lake Charles, La. and the SW course of Baton Rouge, La. to Baton

Rouge, La range station.

(9) Blue Airway No. 46 (Los Angeles, Calif., to Oakland, Calif.). From Lebec, Calif. fan marker to the intersection of the SE course of Oakland, Calif, and the NE course of Salinas, Calif.

Other Civil Airways: Rapid City, S.C., to Spearfish, S.D.: REVOKED.

COMPULSORY REPORTING POINTS: (1) Green Airway No. 3 (San Francisco, Calif., to New York, N.Y.). . . Bay Point fan marker, Calif.; Sacramento, Calif. . .

(2) Amber Airway No. 1 (U.S. Mexican Border to Nome, Alaska). . . the intersection of the E course of Cordova (Hinchinbrook Island), Alaska and the SE course of Cordova (Mile 13), Alaska; Sitka (Biorka Island), Alaska range station; the intersection of the NW course of Sitka (Biorka Island), Alaska and the SW course of Gustavus, Alaska; Cordova (Hinchinbrook Island), Alaska;. . .

(3) Amber Airway No. 7 (Key West, Fla., to Caribou, Me.). . . the intersection of the SW course of Richmond, Va., and the SE course of Blackstone, Va ; the intersection of the SW course of Washington, D.C., and the SE course of Quantico, Va.; Washington, D.C. . .

(4) Red Airway No. 27 (Knoxville, Tenn., to Detroit, Mich.) Dayton, Ohio; Corbin, Ky. range station.

(5) Red Airway No. 30 (Shreveport, La., to Jacksonville, Fla.). . . Baton Rouge, La.; Crestview, Fla. . .

(6) Red Airway No. 42 (Milwaukee, Wis., to LaFayette, Ind.)-CAPTION CHANGE.

(7) Blue Airway No. 38 (Annette Island, Alaska, to U.S.-Canadian Border). Petersburg, Alaska range station; the intersection of the NW course of Petersburg, Alaska and the NE course of Sitka (Biorka Island), Alaska; Haines, Alaska.

Other Compulsory Reporting Points: Montauk Intersection (Int. of the E course of New York (La Guardia), N.Y. and the SW course of Providence, R.I.) - REVOKED.

CONTROL AREAS: (1) Amber Airway No. 1 (U.S.-Mexican Border to Nome, Alaska) Those portions of Amber Airway No. 1 within the limits of the continental U.S. From the U.S.-Canadian Border to a point 25 miles NW of Cape Spencer intersection. From a line extended at right angles across such airway through a point 50 miles SE of Cordova, Alaska range station to a line extended at right angles across such airway through a point 25 miles NW of Skwentna, Alaska range station.

(2) Red Airway No. 41 (Yakutat, Alaska to Gustavus, Alaska). All of Red Airway No.41.

(3) Red Airway No. 42 (Milwaukee, Wis., to LaFayette, Ind.)-CAPTION CHANGE.

(4) Blue Airway No. 32 (Pendleton, Ore. to Fairbanks, Alaska). From Pendleton, Ore. range station to the U.S.-Canadian Border. From the intersection of the NE course of Kenai, Alaska and the W course of Anchorage (Merrill), Alaska to the intersection of the NW course of Anchorage (Merrill), Alaska and the NE course of Kenai, Alaska. From Skwentna, Alaska range station to a line extended at right angles across such airway through a point 25 miles NE of the range station.

(5) Blue Airway No. 38 (Annette Island, Alaska to U.S.-Canadian Border). All of Blue Airway No. 38.

CONTROL AREA EXTENSIONS: (1) San Diego, Calif.-Delete word "Nautical" in overland portion of Control Area Description.

(2) San Francisco, Calif. All that area bounded on the NE by a line extending through the San Francisco, and Moffett Field range stations, on the NW by a line 5 miles NW of and parallel to the SW course of San Francisco, on the W by a line 3 nautical miles off shore, on the SE by a line 5 miles SE of and parallel to the SW course of Moffett Field.

(3) Kansas City, Mo. Within a 42 mile radius of Kansas City, Mo., Mun. Arpt, excluding that segment of the circle bounded by the W boundary of Blue Airway No. 13 and the present E boundary of Amber Airway No. 4 to its intersectionwith Green Airway No. 4 and extending along the E boundary of Green Airway No. 4 to its intersection with the W boundary of Blue Airway No. 13.

(4) Campbellton, Ga. From Campbellton, Ga. range station extending 5 miles either side of the N course of the radio range to its intersection with the NW course of Atlanta, Ga. and extending 5 miles either side of the S course of Campbellton to its intersection with the SW course of Atlanta, Ga.

(5) Fargo, N.D. From Fargo, N.D. range station extending 5 miles either side of the E course of the radio range to a point 20 mi. E of the Glyndon fan marker and from the ILS localizer extending 5 miles either side of the localizer course to a point 20 miles S of the outer marker.

CONTROL ZONES: (1) Richmond, Va. Within a 5 mile radius of Byrd Field, Richmond, Va., extending 2 miles either side of the SW course of Richmond, Va., to the Chester Fan Marker, and extending 2 miles either side of the ILS localizer course to a point 10 miles SW of the ILS outer marker and to a point 10 miles NE of the ILS middle marker.

(2) Fort Worth, Texas. Within a 5 mile radius of Meacham Field extending 2 miles either side of the N course of Fort Worth, Texas to Haslet Fan Marker, and extending 2 miles either side of the S course of Fort Worth, Texas to the intersection of the S course of Fort Worth, Texas and the W course of Dallas, Texas.

(3) Fargo, N.D.: Within a 5 mile radius of Fargo (Hector) Airport extending 2 miles either side of the E course of Fargo, N.D., to Glyndon Fan Marker and extending 2 miles either side of the W course of Fargo, N.D., to Wheatland Fan Marker.

(4) Indianapolis, Ind. Within a 5 mile radius of Weir Cook County Airport, Ind., extending 2 miles either side of the W course of Indianapolis, Ind., to Clayton Fan Marker.

(5) Milwaukee, Wis. Within a 5 mile radius of General Mitchel Airport extending 2 miles either side of the S course of Milwaukee, Wis., to Franksville Fan Marker.

(6) Syracuse, N.Y. Within a 3 mile radius of Clarence E. Hancock Airport, N.Y., extending 2 miles either side of Syracuse ILS localizer course to the outer marker and extending westward 2 miles either side of the E course of Syracuse to the Syracuse range station.

(7) Parkersburg, W.Va. Within a 5 mile radius of Wood County Airport, Parkersburg, W.Va., extending 2 miles either side of the SW course of Parkersburg, W.Va. VHF to a point 10 miles SW of the VHF range station.

(8) Rantoul, Ill.: Within a 5 mile radius of Chanute AFB, Rantoul, Ill., extending 2 miles either side of the SW course of Chanute AFB to a point 10 miles SW of the range station.

(9) Wichita Falls, Texas. Within a 5 mile radius of Sheppard (Kell) Field, Wichita Falls, Texas, extending 2 miles either side of the SE course of Wichita Falls, Tex., to Jolly Fan Marker.

5-MILE Control Zones: (1) DELETE Wichita Falls, Texas, Shepperd (Kell) Field.
(2) ADD Pittsburgh, Pa., Greater Pittsburgh Airport.

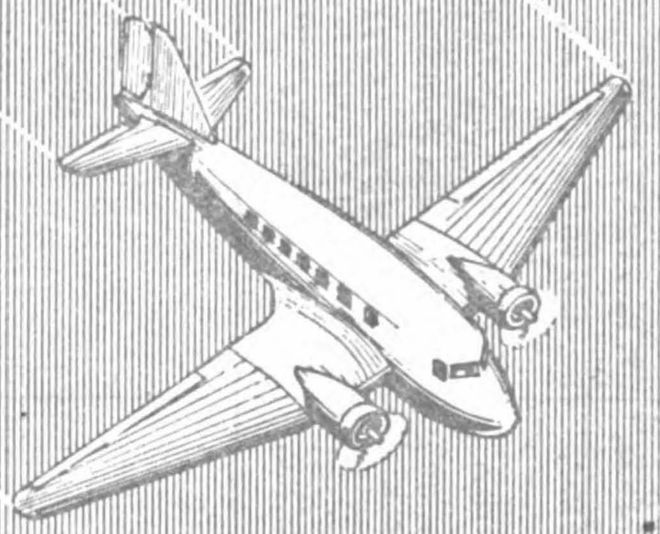
CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airports closed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.



AIRMAN'S GUIDE

DIRECTORY OF AIRPORTS

RADIO FACILITY DATA

NOTICES TO AIRMEN

VOL. 4, NO. 15 .... OCTOBER 11, 1949

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

G C A A V A I L A B L E: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(10-11-49)

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-directional ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use" page 58

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met.

NOTE: Category II indicates by parenthetical (2). Category III = If facility monitored solely through use of automatic visual course monitor and automatic transfer unit. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

(P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)
FMHW . . Non-directional radio beacon when combined with fan marker
GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
IM . . . . VHF boundary marker
L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range
MH . . Non-directional radio beacon (homing) power less than 50 watts
ML . . Range (loop radiators), power less than 50 watts
MM . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . . Additional VHF voice feature on other than range frequency.
VAR . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

NOTE: (1) All C.A.A. communication stations guard 3105,4495,3117.5[1] kc., and 122.1 mc, except in a few isolated cases. C.A.A. communication stations on domestic international aerodromes, in addition to the above guard 6210 kc. 3117.5 kc is not guarded by those stations operating in conjunction with C.A.A. towers.

[1] 3117.5 kc, aircarrier frequency, will be replaced by 126.7 mc, new air carrier enroute frequency, on Nov. 1, 1949. Many C.A.A. stations are already guarding this frequency.

(2) All C.A.A. stations guard and transmit on 140.58 mc. (which is a replacement for 116.1mc) They also transmit on 111.1mc, as indicated in the following tabulation.
(3) All C.A.A. towers guard 3105,4495,3117.5 kc, and 122.5 mc. Caution: Navy towers generally operate daylight hours only.
(4) Range courses are magnetic in-bearings.

****
*Pilots are requested to indicate when calling C.A.A. airway communications *
*stations and control towers the channel or frequency on which the station *
*reply is expected. *
****

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

3. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A - U.S. Air Force	I - Intermediate	N - Navy	
C - Commercial	M - Municipal	NG - Nat'l Guard	
CG - Coast Guard	MG - Misc. Govt.	P - Private	

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

FIELD CLASS

In this column are included the length and surfacing of the longest runway and the lighting and servicing facilities available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runwy or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
Note: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

FUEL OCTANE

Civil Fuel:	Army and Navy Fuels
F1: 73/80 oct.	A+: 145 oct.
F2: 73-80, 91 oct.	A : 100 oct.
F3: 73/80, 91, 100 oct.	B : 91 oct.
NOTE: If only 91 or 100 octane available, this octane cited, and not coded.	C : 73/80 oct.
	J : JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the acft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) STATUS UNKNOWN: These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) ABANDONED: Reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for revenue producing aircraft.

(g) "+" indicates additional (non-temporary) data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3 1 or less.

NOTES

1. ➸ Notam data revising previous issues.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
NOTE: "Blkd" indicates approaches where glide angle to runway is 3 1 or less.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

AIR FORCE SPECIAL NOTICES

✓ AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject. "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla., Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont., or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y., Brookley AFB, Ala., MacDill AFB, Fla., Washington National Arpt, D.C.; Westover AFB, Mass., or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont., Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala

CARIBBEAN: Brookley AFB, Ala., Kelly AFB, Tex., or MacDill AFB, Fla.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala., MacDill AFB, Fla., Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C., Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala., or Mitchel AFB, New York.

PILOT USE OF PLAN 62 INTERPHONE CIRCUITS TO FLIGHT SERVICE: The interphone network of the Military Flight Service Communications System has been extended to include, in addition to active Air Force Bases, Naval Air Stations and Coast Guard Air Stations, most airfields at which are located Air Reserve, National Guard or U.S. Air Force Servicing Detachments. Pilots should, when closing or filing flight plans with Flight Service Centers, check the availability of the interphone facility before placing long distance telephone calls.

✓ CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Military Emergency (a) USAF GCA (IFR or emergency)
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at A.F. installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all USAF GCA installations will for the next 30 to 60 days maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations channel "A" (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (9-13)

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.

b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.

c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SANSE AS THOSE OUTLINED IN PARAGRAPH 37, A.F. REGULATION 60-16, JULY 11, 1949"

AIRPORT AND INTERMEDIATE ROTATING LIGHTS: Unfamiliarity with the types and coding of rotating lights used to denote airports and intermediate fields has caused accidents. Rotating lights on civil airports and intermediate fields are of a different type and have several different codings than those used on military fields. Basically all civil airport rotating lights are flashing white lights with alternating green flashes. All military rotating lights are of the double peak or split beam type giving two white flashes between alternating green flashes.

All pilots should familiarize themselves with the details and coding of rotating lights which are contained in the Flight Information Manual, Volume 4, Number 1, dated August 1, 1949.

CANADIAN STATION RETENTION OF 116.1 MC: All Canadian stations listed in A.N. 08-15-1 will retain frequency 116.1 mc until further notice. Frequency changeover of international emergency frequency 121.5 mc to replace present military emergency frequency 140.58 mc will not be accomplished until approximately November 1, 1949.

CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) Correct listing under Wold-Chamberlain (Minneapolis, Minn.) by showing elevation as 848'.

(2) Correct Canadian data as follows: Page 6, Lethbridge, Alta., add ILS on Channel X, magnetic heading 69°, page 22, Earlton Jct-NE crs realigned to 265°.

(3) Correct page 94, under Lewistown, Mont., by showing class of VHF omnirange as BVOR.

(4) Correct page 72, under Cherry Point MCAS, N.C., by deleting following remarks: Range to be inoperative until approx Sept. 5. (Range resumed operation)

(5) Correct page 78, by showing Military Airways Sta. at New Orleans NAS control frequency 3295 kc at NAS.

(6) Correct page 25, by showing Megantic range crs's realigned to 82-172-262-352.

CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: (1) The following ADF procedure authorized for Mather AFB, using Mather homing facility; freq. 476 kc; ident. MHR; Initial approach altitudes: NE-11,000' (DOS range sta), 7000' (Blue Canyon FM), 3500' (Auburn FM), SE-3000' (SCK range sta), SW-3000' (SAC range sta), NW-3000' (ILA range sta); Shuttle: SW crs SAC range-holding as directed by SAC radio; Final approach heading: 220° mag. inbound; Complete procedure turn on left side outbound 40° mag. heading within 10 mi. at minimum alt. of 2500'; Low cone: 600'; Bearing and distance sta to field: 216°, 0.8 mi.; Field elev.: 91'; Min. alt. over airport: 591'; Missed approach procedure: Proceed on 160° mag. heading, climbing to 3000'; Remarks: Caution-terrain 2100' 15 mi out on approach course.

(2) Correct Instrument Approach Procedures as follows:

(a) Abilene, Tex.: Missed approach procedure: Climb to 3800' within 10 mi on S crs, or (when directed by ATC), turn left, climb to 3000' on E crs within 25 miles.

(b) Ft. Myers (Page Field), Fla.: Change Initial approach alt to NW-1300' (TPA range sta); Mag. bearing: 38°.

(c) Huron, S.D.: Add asterisk before Low cone *2000'; Missed approach procedure: Climb to 2900' on NE crs within 25 mi.; Distance range sta to field: 2.8 mi.

(d) Klamath Falls, Ore.: Change Minimum alt over airport to: 5985'; Ceiling over arpt: 1900'.

(e) Rock Springs, Wyo.: Change Distance range sta to airport to: 2.9 mi.

(f) Savannah (Hunter Field), Ga.: Missed approach procedure: Climb to 1300' on NE crs, or alternate procedure (when directed by ATC), turn left, climb to 1300' on NE crs SAV range.

(g) Tri-City, Tenn.: Change listing to Bristol, which is designated location. Name of airport is Tri-City; Min. alt over arpt: 2323'; Ceiling over airport: 800'.

(h) Trinidad, Colo.: Complete procedure turn *East side N crs within 10,15,20,25 mi.-7100'; Mag. bearing and dist sta to fld: 162°, 2.5 mi.; Missed approach procedure: If contact not established over airport make immediate 180° climbing left turn and climb to 7500' on N crs**; Remarks: *Procedure turn to E account high terrain to the W. **CTN: Abrupt rise in terrain 8 mi SSW of arpt. Terrain 9586' 12 mi SSW of airport.

(i) Wichita Mun., Kans.: Missed approach procedure: Climb to 2500' on S crs, or alternate procedure (when directed by ATC), climb to 3000' on SW crs; Remarks: Rnwy 6L and Rnwy 24R not authorized at night.

(j) Lowry AFB, Denver, Colo.: Change elev. to 5420'; Min. alt over arpt: 5908'.

CHANGES FOR A.N. 08-15-2: Correct page 61, by changing listings of Air Rescue Squadrons and Flights as follows:

1st Rescue Sq. MacDill AFB Tampa, Fla.	Tampa H-8811 Ext. 628	4th Rescue Sq. Hamilton AFB San Rafael, Calif.	Ignacio 5000 Ext. 3227-3228	6th Rescue Sq. Westover AFB, Chicopee, Mass. Telephone No.: Chicopee 1740
Flt "B", 4th Rescue Sq. March AFB Riverside, Calif.	Moreno LD 20 Ext 4206	Flt "C", 4th Rescue Sq. McChord AFB Tacoma, Wash.	Lakewood 2121 Ext 5144-5126	
5th Rescue Sq Lowry AFB Denver, Colo.	Dexter 8581 Ext 820-898	Flt "B", 5th Rescue Sq. Biggs AFB El Paso, Texas	El Paso E 51411 Ext 3701	
Flt "C", 5th Rescue Sq. Maxwell AFB Montgomery, Ala.	Maxwell AFB Ext. 6157	Flt "D", 5th Rescue Sq. Selfridge AFB, Michigan	Mt. Clemens 2511 Ext. 3105	

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

NAVY and U.S.A.F. GCA CHANNELS: See item under Air Force Special Notices, entitled, "U.S.A.F. and Navy GCA Channels":

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the otherhand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standarization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention, W-155, C.A.A., Washington 25,D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents and individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D.C.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400 feet and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, and Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

NOTE: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR Airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR Airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

(10-11-49)

CAA AIRWAY COMMUNICATIONS STATIONS TO GUARD 126.7 MC INSTEAD OF 3117.5 KC: Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on November 1, 1949. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started. By November 1st, when the watch on 3117.5 kc is discontinued, all CAA stations will be guarding 126.7 mc.

NOTE: Effective November 1, 1949, CAA control towers will guard 3117.5 kc only on request. Guard will be established within ten minutes after request received.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA airway communications stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded.

CAA AIRWAY COMMUNICATIONS STATIONS DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. After September 1, 1949, military stations and aircraft will use 121.5 mc, the international VHF emergency frequency, for their emergency frequency.

NOTE: 140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTION: Correct C&GS Radio Facility Chart #47, by showing Engle, N.M. with cont. listening watch on 121.5,126.7,122.1 mc.

✓ A.T.C. AREA BOUNDARY REVISION: The Detroit-Toronto ATC Area Boundary on Red Airway No. 12 has been changed from International Boundary to 15 miles East of SE course of Sarnia Radio Range.

ATC BOUNDARY REVISION: Effective October 15, 1949, the control boundaries between the New York and Washington Areas on Green Airway No. 5 and Red Airway No. 77 will be relocated to a point five miles NE of the Dover, Delaware VAR Range Station.

✓ DESIGNATION OF NON-COMPULSORY REPORTING POINT: Effective October 5, 1949, with the realignment of the E course of Allentown, Pa., the intersection of the E course of Allentown, Pa. and the SW crs of Newark, N.J. was designated as a Non-Compulsory Reporting Point and named: NEW BRUNSWICK.

✓ VHF IFR FLIGHTS: If a pilot desires to conduct IFR flight using VHF (VOR as well as VAR) ranges over all or a portion of the route, his flight-plan should so indicate.

NOTE: Flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A.T.C. clearances so authorize.

✓ NON-STANDARD HOLDING PATTERNS: (1) Effective October 15, 1949, Non-Standard Holding Pattern will be established: Fresno ILS Middle Marker; Direction from holding point: SE; Direction of turn: Left on S side of SE lclzr course; Time: 2 minutes; Min. altitude: 2000'.

(2) The Metuchen Non-Standard Holding Pattern was discontinued and in lieu thereof aircraft is held at the Linden "H" facility as follows: "Between Linden and a point two minutes SW on the W side of the SW crs of the Newark radio range, with left turns".

(3) The following Non-Standard Holding Patterns have been established:

(a) Reno (LF) Radio Range; Direction from holding point: N; Direction of turn: Left on E side of N course; Time: 2 minutes; Minimum alt.: 9500'.

(b) Phoenix (LF) Radio Range Station; Direction from holding point: E; Direction of turn: Left on S side of E course; Time: 2 minutes; Minimum alt.: 4000'.

(c) Phoenix ILS Outer Marker; Direction from holding point: E; Direction of turn: Left on S side of E course; Time: 2 minutes; Minimum alt.: 4000'.

✓ FLIGHT INFORMATION MANUAL AMENDMENTS AND CORRECTIONS: (1) Correct page 30, under Tampa, Florida, by changing telephone numbers to: CAA 80-2521; and WB 80-1141.

(2) Correct page 32, by deleting El Morro CAA Zone 376.

(3) Correct page 123, by deleting under Monterey, Calif., KDON and inserting KMBY. Operational data remains the same.

(4) Correct page 124, by deleting under Santa Cruz, Calif., KRUZ and inserting KDON. Operational data remains the same. (NOTE: KRUZ is no longer in existence).

(5) Correct page 137, by changing Call Letters for Mitchell, S.D., from KMHK to KORN.

(6) Correct page 132, by adding Elko, Nevada; Call Letters: KELK; Freq (kc): 1340; Pwr.Kws: .25; Tower Location: 1.5 NE; 40-51-00, 115-44-30; Tower data-Hgt: 206', Type: A; Hours of Operation: 6:30 A.M. to 11 P.M., except Sunday 8:30 A.M. to 10 P.M.

✓ DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective October 18, 1949, unless otherwise advised:

AMENDMENT NO. 13

(1) RAINBOW POINT, FLORIDA, listing is amended by changing the "Name and Location (Chart)" column to read: "Dinner Point (Orlando Chart)".

(2) CAMP RIPLEY, MINN. (Duluth Chart) - Area is added: Description: N boundary: lat. 46-10-30N, S boundary: lat 46-09-55N, E boundary: long. 94-21-00W, W boundary: long. 94-26-00W; Altitudes: Surface to 30,000'; Time: Continuous; Using Agency: Camp Ripley, Minn.

(3) PLUM TREE ISLAND, VIRGINIA, listing is amended as follows: Description: Beginning at lat 37-06-00N, long. 76-16-00W; due N to lat 37-12-00N; due W to long. 76-22-30W; southerly to lat 37-06-00N, long. 76-22-00W; due E to lat. 37-06-00N, long. 76-16-00W, point of beginning; Altitudes: Surface to 40,000'; Time: 0800-1700, daylight hours only; Using Agency: Tactical Air Command, 9th Air Force, N.A.C.A., Langley AFB, Virginia.

(4) HUMMULA, HAWAII (Island of Hawaii Chart-634) - Area is added: Description: Beginning at lat 19-46-00N, long. 155-37-00W; ESE to lat 19-45-00N, long. 155-32-00W; SE to lat 19-41-00N, long. 155-30-00W; due S to lat 19-37-00N; due W to long. 155-36-00W; northerly to lat 19-46-00N, long. 155-37-00W, point of beginning; Altitudes: Surface to 12,000'; Time: 0800-1700 and as indicated in Notices to Airmen; Using Agency: National Guard Units of Hawaii.

WEATHER REPORTING SERVICE

Weather Reporting Location	Lat., Long.	Elevation	Change in Weather Service
Hawley, Pa. (Mountain Bay Airport)	41-23,75-14	1460'	SW reports to be available soon
El Paso, Illinois			Radar reports to be available soon
Peru, Ind. (Bunker Hill Airport)	40-44,86-07	650'	SW reports to be available soon
Kalamazoo, Michigan			"
Youngstown, Ohio	41-16,80-40	1178'	6-Hourly reports to be available soon
Columbus, Ohio (Lockbourne AFB)			Hourly reports discontinued.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary

conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam services gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Stations Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - new or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - new or revised radio data to be inscribed on charts or added to records.

NOTE - Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: SPECIAL NOTICE: The address of the CAA District Arpt Engineer is Old Post Office Bldg., Montgomery, Ala.

BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (9-24)

BROOKLEY AFB (MOBILE): All GCA runs will pull up at 1/2 mi from end Rnwy 14-32. Rnwy 14-32 clsd except emerg-due const. (9-27)

CLANTON-GRAGG ARPT, SITE 27, MEM-TPA: Ctn, const. Equip. on fld. Graded areas hazardous. (9-9)

EUTAW ARPT: NW/SE Strip hazardous, unusable. Use NE/SW Strip only. (9-9)

FT. MORGAN AIRFIELD: New fld under const approx lat 30-13-30, long. 88-00-30. Unusable. (6-6)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (1-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (6-23)

MOBILE-BATES ARPT: Equip. on fld, const. Use rnwys only. 40' antenna mast 400' E of NW end of NW/SE Rnwy. (9-3)

MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern sector within 20° E and W mag. north where severe course indicator roughness is present. (6-30)

SELMA-SELFIELD ARPT: Ctn, equip. on fld. (9-9)

ARIZONA: SPECIAL NOTICE: The address of the CAA District Airport Engineer is 707-1/2 W. Thomas Road, Phoenix, Arizona.

DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (9-6). Rnwy 8-26 clsd. (9-29)

FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N-Hwy 66; E-Riordan, Ariz.; S-Sycamore, Canyon; W-Garland Prairie.

GILA BEND AF AUX: All obsts except 208' twr 1/2 mi S of fld not lgtd. (9-13)

PHOENIX: Exten trng on Phoenix Rng on all courses except W. (6-2)

PHOENIX-RADIO: Soon, apch control procedures will be placed into effect. (9-30)

PHOENIX-SKY HARBOR ARPT: All taxiways except N of E/W rnwy clsd. Rnwys 8R-26L, NE/SW clsd. (8-4)

PRESCOTT-RADIO: LF rng flgt-checked Oct. 7, 1949, courses correctly aligned.

YUMA COUNTY ARPT: Bcn inop. (10-11).

ARKANSAS: SPECIAL NOTICE: The address of the CAA District Arpt Engineer is Adams Field, P.O. Box 1397, Little Rock, Ark.

FORT SMITH ARPT: Rnwy lgtg sys inop. E/W rnwy will be lgtd by smudge pots until 2200, no lgts after 2200. Black top portion W end of E/W Rnwy unsafe for acft of twin engine size or larger. (8-18)

HELENA-THOMPSON-ROBBINS ARPT: Inten pilot trng in crop dusting days. Ctn, mounds of gravel along W side N/S Rnwy(9-16)

LITTLE ROCK-ADAMS ARPT: 150' smoke stack being erected 2100' NW of intxn of N/S and NW/SE Rnwys. (9-1)

PINE BLUFF-RADIO: Courses aligned by grnd-check only. (5-20)

ARKANSAS: SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip.(9-28)

WALNUT RIDGE-RADIO: LF rng courses aligned by grnd check only. (4-11)

CALIFORNIA: SPECIAL NOTICE: CAA District Arpt Engineer addresses are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.

**ALAMEDA NAS: Correct lat 37-47-00, long. 122-19-00. (9-22) Maint high apch on Rnwys A26L and 21, hvy acft parked these areas. (8-15)

**ARVIN ARPT: New fld. Lat 35-12-15, long. 118-54-45. (6-20)

BAKERSFIELD-KERN CO. #1 ARPT: 15' bldg 300' N of apch end Rnwy 30 and E of N/S Taxi Strip. Const between apch end Rnwy 25 and E/W Taxi Strip just W of N/S Taxi Strip, mrkd. Use rnwys, taxi strips only. (9-3)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: Soon, CAA ILS lclzr and OMK will be comm on test basis until approx Nov. 10. Lclzr freq: 109.5 mc, channel X, lctd 150' W of W end E/W rnwy. Ident. "BUR". OMK freq 359 kc, ident. "BU" lctd 4.44 mi W of W end E/W rnwy (on back course of lclzr)(10-4) FLD: Clsd to all trans P-80 acft except on special projects for modification. Rnwy 13-31 clsd, parked acft. (8-26)

★CASTLE AFB (MERCED)-RADIO: Mil Arwys Stn operates on VHF channels C-D, 132.3 mc 4765 kc. (9-27)

CASTLE AFB (MERCED): Use Rnwy 12-30 only, acft parked on lndg mat. (8-31)

CONCORD-BUCHANAN ARPT: Equip. on fld. (7-15)

COSO JUNCTION ARPT: E/W Strip under const. (7-22)

CRESCENT CITY-RADIO: Soon, VHF omnirng voice commun and bdcast will be estab on 115.9 mc and teletype commun and weather reporting services will be comm. Stn will transmit on 111.1, 140.58 mc; grds: 122.1,126.7,140.58 mc. Class: BVOR-DTV. (9-27)

CULVER CITY: Balloon type kites will be flying intermittently at an alt of 1000' MSL at Hughes Acft Co., 3 mi NW of Los Angeles Arpt, 0800 to 1700 daily Aug 25 thru Oct. 25. (8-30)

**DELANO-DUNLAP ARPT: New fld. Lat 35-44-15, long. 119-07-15. (6-21) Ctn: equip on fld. (6-21)

DESERT CENTER INT FLD: Ctn, equip. on rnwys and taxiways days, resealing pavement. (9-28)

FAIRFIELD-SUISUN AFB-RADIO: USAF VHF/DF oper for trng and familiarization only. Call sign: Fairfield DF Homer; Freq. 139.32 and 121.5 mc. Hrs of oper: 0700-2400 daily. (8-31)

FAIRFIELD-SUISUN AFB-TOWER: USAF ILS Channel Z oper on req only. (7-28)

**FAMOSO AUX ARPT: New fld. Lat. 35-38-15, long. 119-12-45. (6-21)

FORT JONES-RADIO: Soon, voice fac will be comm on LF rng freq 224 kc, Ident: "FJS". Sched bdcasts will be made simul with Montague H fac. Controlled from Montague INSAC. Class will be: SBRAZ-DTV. (9-16)

FRESNO-RADIO: VHF omnirng on 112.9 mc, gnd-checked only. (9-27)

FULLERTON ARPT: Equip. on fld. (6-24)

**GALT-HERALD ARPT: New fld. Lat. 38-18-00, long. 121-15-00. (8-25)

HAWTHORNE ARPT: Equip. on N side of Rnwy 9-27. (9-14)

HAYWARD ARPT: Const parallel to Rnwy 28. Equip. on fld days. Taxiway lgts discont during const. (10-4)

IMPERIAL-COUNTY ARPT: Ctn, NNW/SSE Strip under const. (10-10)

[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is P. O. Box 1616, 625 E. Main St., Richmond 3, Va.
ALEXANDRIA ARPT: E/W and NW/SE Strips clsd. Northern half of NE/SW Strip clsd, const. (10-10)
**BEDFORD ARPT: Reinstated. Lat 37-19-30, long. 79-32-45. (3-15)
BLACKSTONE AAF: Unlgtd wind sock installed near inop tetrahedron. (6-24) E/W Rnwy clsd. Ngt lgts on N/S Rnwy only. (10-6)
CHINCOTEAGUE NAAS: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders. Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous opers. (8-18)
**CHINCOTEAGUE SEAPLANE BASE NO. 1: Formerly carried Chincoteague Seaplane Base. Lctn: 1 mi SE; Assateague Channel. Major acft and engine repairs part time. Fuel: (F1).
DAHLGREN: A Ctld Firing Area has been estab approx 18 mi ESE over the Potomac Riv for use by Dahlgren Naval Proving Grounds. Area is described as follows: Beginning at lat 38-12-20, long. 76-34-40; SW to lat 38-09-00, long. 76-37-00; WNW to lat 38-09-55, long. 76-44-00; NE to lat 38-11-10, long. 76-42-20; NNW to lat 38-13-25, long. 76-42-50; NNW to lat 38-14-40, long. 76-43-25; ESE to point of beginning. Adequate notice will be given in advance of firing activity.
DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri. Official flgts must be cleared thru one of the following: NAS: Anacostia, D. C.; Patuxent River, Md.; Norfolk, Va.; Quonset Point, R. I.; Lakehurst, N. J. CGAS: Cape May, N. J. NAF: Inyokern, Calif.; Torpedo Stn, Newport, R. I.; Naval Acft Factory, Philadelphia, Pa. MCAS: Cherry Point, N. C.; Quantico, Va. AFB: Eglin, Valparaiso, Fla.; Langley, Hampton, Va.; Wright, Dayton, Ohio. Proving Ground: Aberdeen, Md. (5-5)
The importance of avoiding the Dahlgren danger area is emphasized by several near accidents recently during periods of danger area activation. Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.
**DANVILLE ARPT: Concrete ramp enlarged from 20,000 to 65,000 sq. ft. (10-7)
EMPORIA ARPT: Bcn inop. (8-8)
FALLS CHRUCH ARPT: Equip on fld. (8-15)
GALAX ARPT: Equip on fld. Ctn taxying off strips. (8-8)

[redacted]: HOPEWELL ARPT: E/W, 9-27, lndg strips clsd. Const. (8-29)
LANGLEY AFB (HAMPTON)-RADIO: USAF VHF/DF inop. USAF LF rng unreliable pending flgt-check. (9-10)
LANGLEY AFB (HAMPTON): Const apch ends of all rnwys. (8-31)
MOUNT VERNON: See special notice under District of Columbia.
MOUNT VERNON-RADIO: About Oct 14, ident FMHW fac will be changed from "W" to "MTV". (10-7)
NEWPORT NEWS-PATRICK HENRY: Const ENE/WSW Rnwy. Equip crossing S end NNE/SSW Rnwy. (8-8)
NORFOLK NAS (CHAMBERS FLD): Avail for lcl daylgt flgt opers only. (8-15)
OCEANNA NAAS-RADIO: Navy GCA unit 2 comm for trng. (10-5)
PORTSMOUTH ARPT: Ctn, equip on strips, const. (9-8)
PRICE MT BCN SITE 37, BRR-DCA: 190' drilling derrick lctd atop Price Mt. 1 mi WSW. Lgtd by clear lgts. (7-12)
**PULASKI-CLAYTOR LAKE SEAPLANE BASE: PRIVATE P-line NE. Ramp, floats, docks. (3-16)
RICHMOND-BYRD ARPT: Rnwy 6-24 clsd Mon thru Fri, between 0730 and 1730, const. Open ditches, mounds of dirt and equip alongside and ends of rnwy and connecting taxiway. Rnwy will be open during inst weather only during hrs indicated. N/S Taxiway clsd frequently between N and S center taxiways, Mon thru Fri between 0730 and 1730. Equip crossing taxiway. Use hard surface areas only. Grass area unsafe for taxying or parking. No fuel avail for trans mil acft. (10-4)
ROANOKE-RADIO: VHF omnirng on 114.2 mc shut down - relctn. (7-1)
ROANOKE-WOODRUM ARPT: Equip adj all rnwys. (8-8)
WAVERLY ARPT: 2500' NE end NE/SW Strip unusable. Usable portion of strip mrkd. (7-2)
**WILLIAMSBURG-SCOTT FLD: Correct lat 37-17-00, long. 76-43-00. (8-28)
[redacted]: SPECIAL NOTICE: The address of the C A A. District Airport Engineer is CAA Bldg., Boeing Field, Seattle 8, Washington.
SPECIAL NOTICE: Unmrkd p-lines extending across coves in Puget Sound area and lakes. (10-3)
BELLINGHAM-RADIO: LF rng monitor sys oper on test basis. Spurious signals may be emitted. (4-26) VHF omnirng 294° radial, which lies over Vancouver B. C., has a usable dist of 20 mi acct course roughness at the lowest instr alt of 1500' MSL. (8-6)
BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate, must register at CAA Comms Bldg. (2-3)
BOTHELL-KENMORE ARPT: Acft parked 40' from both sides of strip. (10-6)
**BREMERTON-LEISURELAND ARPT: New fld. Lat 47-36-30, long. 122-46-00. (8-19)
COLLEGE PLACE-MARTIN FLD: Const, main rnwy. Use sod strip on S. (7-14)
★ELLENSBURG-RADIO: Oct 3, 1949, S course of LF rng realigned from 342° to 346°. Gnd-checked only. (10-3)
**EVERETT-PAINE FLD: 50' antenna mast erected 983' S and 375' E from N end and centerline of Rnwy 16-34. (9-28) N/S Rnwy clsd, const. (10-4)
HOQUIAM-MOON ISLAND ARPT: Const along side ramp and adj to E end Rnwy 6. (5-19)
**HOQUIAM-MOON ISLAND SEAPLANE BASE: Major acft and eng rprs. Fuel: F1. (8-26)
ISSAQUAH, BCN SITE 1, SEA-HLN: Inop. (7-13)
**KENMORE-AIR HARBOR SEAPLANE BASE: Lctn: 0.8 WSW; Lake Washington. Fuel: F2. (8-5)
★McCHORD AFB (TACOMA)-TOWER: USAF twr transmits: 396 kc, 126.18 and 121.5 mc; grds 3105,3117.5,4495 kc, 126.18,121.5 mc. (9-30) FLD: Correct lat 47-08-45, long. 122-28-45. (9-27)
**McCLEARY ARPT: New fld. Lat 47-05-00, long. 123-16-30. (6-23)
METALINE FALLS-SULLIVAN ARPT: Circle fld to stop auto tfc. (1-26)
MT VERNON OLF: Clsd to all acft except those permitted by the C.O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (3-4)
**PORT ANGELES SEABEE HARBOR SEAPLANE BASE: ABANDONED (9-28)
PROSSER ARPT: Gliding and soaring over fld and vcnty. Use rnwys only. (9-28)
**PROSSER-L & D SEAPLANE BASE: Combined oper with arpt; drag arpt for svcg. (9-28)
**RANDLE-CISPUS RIVER LODGE ARPT: New fld. Lat 46-26-45, long. 121-53-00. (5-1)
**RENTON-WILL ROGERS-WILEY POST MEMORIAL SEAPLANE BASE: Formerly Renton Seaplane Base. Combined oper with Renton Mun Arpt. (9-28)
**ROSARIO SEAPLANE BASE: PRIVATE (EMERG ONLY) Ramp. (9-7)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, [redacted]: Seattle, approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an inst weighing approx 1-1/2 lbs suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (1-31)
SEATTLE-RADIO: Auto. rng monitor sys placed in oper on LF rng on exper basis. Spurious signals should be disregarded. (3-23) VHF omnirng shut down Sept 16, 1949 - relctn. (9-16)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to the E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. Avoid flagged area E side of strip. Equip on fld. N 250' rnwy clsd, const. Temp rng lgts set at edges of rnwy 250' from N end. Usable rnwy 5550'. Const Rnwy 13-31 daylgt hrs. (8-22)
SEATTLE NAS: Single-eng acft will enter the tfc pat over Kirkland at 1000', at which point lndg instructions will be reqd from the twr. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-16)
SEATTLE-SEATTLE-TACOMA ARPT: Equip on fld. (5-25)
SNOHOMISH ARPT: WNW/ESE Strip only 1320' long with dirt piles adj to WNW end. (7-1)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with free swinging tetrahedron. When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd areas S of rnwy. (7-12)
SPOKANE-GEIGER FLD: Equip on fld. (9-27)
TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of the city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (4-12)
WALLA WALLA-CITY CO ARPT: Rnwy 7-25 clsd ngts. Ctn, const lndg area days. (7-8)
WENATCHEE: Unmrkd p-line crosses Columbia River 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (5-16)
WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)
★YAKIMA-RADIO: VHF omnirng flgt-checked and comm Oct 8, 1949. Freq: 116.0 mc. Ident: "YKM". Stn lctn: lat 46-34-13, long. 120-26-35. Bear. and dist stn to Yakima Arpt: 246°, 4.2 mi. Elev: 983'. Var. 22° E. Monitor. category (1). Class: VORW. (10-9)
[redacted]: SPECIAL NOTICE: The address of the C A A District Airport Engineer is Kanawha County Court House, Charleston, W. Va.
CHARLESTON-KANAWHA CO. ARPT: Equip SE side Rnwy 5-23. Equip crossing Rnwy 15-33 days. Obsts mrkd day, ngt. (7-25)
**CRAIGSVILLE-REYNOLDS ARPT: New fld. Lat 38-19-30, long. 80-39-00. (6-18)
**SUMMERSVILLE-CANVAS ARPT: New fld. Lat 38-16-00, long. 80-48-15. (6-18)
WHEELING-OHIO-CO. ARPT: Lndg area under const. (10-10)
**WHEELING SEAPLANE BASE: Mar. rlwy, float, crash boat. N winds take-off N lndg S of bridge. Reverse pattern in S winds. (5-4)
**WILLIAMSBURG-MAUZY ARPT: New fld. Lat 37-59-00, long. 80-29-00. (6-20)
[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is 638 State St., Madison 3, Wis.
CABLE UNION ARPT: Ctn, apch clearing in progress. (10-7)
GRANTSBURG-RADIO: Temporarily scheduled bdcasts made on the hr and 30 min past the hr. Teletype service will be inaugurated at a later date. (8-2)
**GREEN BAY-AUSTIN STRAUBEL ARPT: Oct 1, lctn ident assigned "GRB". (9-20)
MADISON ARPT: Equip on fld days. Sod unsafe. (8-1)
MILWAUKEE-GENERAL MITCHELL FLD: Full length of Rnwy 13-31 open days and N from green rng lgts at ngt. Rnwy 18-36 clsd const, except 2600' N end open days only. Taxiway from Rnwy 1-19 to Rnwy 6 clsd. Rnwy 7-25 clsd, hi-tension obsts. Rnwy 9-27 not to be used at any time with wind under 8 mph except in emerg or upon demand by pilot for definite reason, or take-offs in inst weather to expedite tfc. Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Army twr lctd W side clsd and should not be confused with CAA twr lctd N side. (9-27)
**NIAGARA ARPT: New fld. Lat 45-46-00, long. 88-01-00. (8-23) Const of NE/SW Strip. (8-23)

[redacted]: **PEWAUKEE-AERO PARK APRT: New fld. Lat 43-06-30, long. 88-09-30. (6-17)
PORT WING ARPT: NE/SW Rnwy under const. (9-9)
RHINELANDER-ONEIDA ARPT: Ctn, equip on SW apch. (9-9)
[redacted]: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is Stapleton Airfield, Denver 7, Colo.
AFTON ARPT: Deep irrigation ditch runs entire W side of Strip. Strip varies in width from 70 to 100'. Extreme ctn. (8-7)
CASPER-RADIO: VHF omnirng 22° radial course rough beyond approx 35 mi from stn. (7-1)
CASPER AFB: All rnwy lgts inop, except on Rnwys 3-21, 12-30. (3-21)
DULL CENTER-SHERWIN #1 ARPT: Irrigation intermittently during summer months and 5" pipe may be across center of stripe. When soft or obstd, will be mrkd, then use Sherwin Arpt #2. (3-31)
RAWLINS ARPT: Use new ENE/WSW and N/S stripe only. (8-15)
SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (7-8)

RADIO FACILITY CHARTS

For dates of latest prints of Radio Facility Charts see separate "Check List for Dates of Current Radio Facility Charts", published bi-weekly for distribution with these charts. It may also be obtained free, upon request.

PLANNING

AP 9	June, 1949	3069a	Aug. 17, 1949

AIRCRAFT POSITION CHARTS

3071	North Atlantic	Aug. 15, 1949.	3072	Western Europe and Africa	Mar. 5, 1948.	3073	Caribbean Sea	April 27, 1949

ROUTE CHART

2201	Chicago to Gander	Dec. 20, 1948

(10-11-49)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Butte	Miles City	San Francisco	Yellowstone Park
Denver	Mt. Whitney	Seattle	3060d
Klamath Falls	Rapid City	Trinidad	Seattle local

New Prints of the chart listed below will be published in about one month. These prints WILL NOT make the former print obsolete for use in aviation.

Williston

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each; by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the dates of Latest Prints of Instrument Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

RESTAURANT, GROUND TRANSPORTATION, AND SLEEPING FACILITIES FOR TRANSIENT FLIERS

Airport Restaurant, Ground Transportation and Sleeping Facilities: The itinerant flier must appreciate that very many of the smaller airports, especially in small communities, do not have restaurant or even snack bar facilities. Furthermore, transportation into town and hotel accommodations on the airport may be limited or non-existent.

Airport Attendant: The above is true to a certain extent for servicing also which very frequently is on a part-time or week-end only basis (fields with part-time servicing are cited in the Directory of Airports with a parenthetical S).

Landing Fees: Very few airports have landing fees for the non-commercial transient flier, or parking or tie-down charges for short visits. On the other hand, the transient flier will find that a great number of fields have tie-down charges for over-night, or longer, stops.

Pre-Flight Planning: Obviously, if a flight to a particular community is mandatory, prior knowledge that the community's airport has no restaurant or sky-tel and only limited airport-to-town transportation facilities will not cancel that flight. On the other hand, fliers with no particular objective in mind and desiring such facilities should choose airports cited in the Directory as having full-time attendants, a wide range of fuels, repairs, lights, and located in large communities. These, of course, are indicative that food and ground transportation are available.

****

NOTE: All this is prelude to the fact that CAA restaurant, transportation and rooming data are incomplete and difficult to maintain on a current basis. Furthermore, the Guide's stringent page limitations prevent the inclusion of such data that are, or could be made, available.

PLEASE POST!

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airports closed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICE

VHF IFR FLIGHTS: If a pilot desires to conduct IFR flight using VHF (VOR as well as VAR) ranges over all or a portion of the route, his flight-plans should so indicate.

NOTE: Flights should not be conducted on civil airways in IFR weather using VHF ranges unless the A. T. C. clearances so authorize.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A) = Air Force Facility. G.P. = **Glide Path.** L7=Hi-intensity **approach lgts.** (W) = Without voice. (&) = On test basis, unmonitored and not **to** be **used for navigation.** MMK's, OMK's **are at the same** locations **as the middle** and **outer markers unless otherwise** specified. → New **or revised data.**

(10-25-49)

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use" page 58.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III=If facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This feature may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)
FMHW . . Non-directional radio beacon when combined with fan marker
GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
IM . . . VHF boundary marker
L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range
MH . . Non-directional radio beacon (homing) power less than 50 watts
ML . . Range (loop radiators), power less than 50 watts
MM . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
P . . . . Point-to-Point radio
RA . . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . . Simultaneous (range signals and voice) type of transmitter.
T . . . . Teletype
TX . . . Principal teletype
V . . . . Additional VHF voice feature on other than range frequency.
VAR . . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

NOTE: (1) All C.A.A. communication stations guard 3105, 4495, 3117.5[1] kc., and 122.1 mc, except in a few isolated cases. C.A.A. communication stations on domestic international aerodromes, in addition to the above guard 6210 kc. 3117.5 kc is not guarded by those stations operating in conjunction with C.A.A. towers.

[1] 3117.5 kc, aircarrier frequency, will be replaced by 126.7 mc, new air carrier enroute frequency, on Nov. 1, 1949. Many C.A.A. stations are already guarding this frequency.

(2) All C.A.A. stations guard and transmit on 140.58 mc. (which is a replacement for 116.1mc) They also transmit on 111.1mc, as indicated in the following tabulation.
(3) All C.A.A. towers guard 3105, 4495, 3117.5 kc, and 122.5 mc. Caution: Navy towers generally operate daylight hours only.
(4) Range courses are magnetic in-bearings.

****
Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the channel or frequency on which the station reply is expected.
****

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(A) Airport name (with A in Type Column) - field owned or leased in whole by U. S. Air Force. As such, field is open to civil acft only by prior permission of C. O. thereof.

(A) City and Airport Name (with C,I,M,MG, or P in Type column) - a civil airport with Air Force operations, reserve training, or other such activity thereon.

NOTE: Similar combinations of N, CG, and NG indicate the same is applicable for Navy, Coast Guard, and National Guard fields, respectively.

(P) City and Airport Name - Civil airport covered by an agreement between municipality and Air Force which permits use by transient military aircraft.

* City and Airport Name - C.A.A. Int. Field, open to mil acft. "*Effingham, 10, STL-IND," for example, indicates that the airport is Effingham C.A.A. Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.

NOTES:

1. Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

2. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A", "N", "NG", or "CG" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

3. When city and airport names are identical, the airport name is omitted in the interest of space-conservation.

TYPE

A	- U.S. Air Force	I	- Intermediate	N	- Navy
C	- Commercial	M	- Municipal	NG	- Nat'l Guard
CG	- Coast Guard	MG	- Misc. Govt.	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NO. OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY
FACILITIES

In this column are included the length and surfacing of the longest runway and the lighting and servicing facilities available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)
aw - allway field
(26) - runwy or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
Omission of B indicates beacon is not available.
Note: Code beacons are not codified, and are carried in Remarks Column.

L: Field Lighting
L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Strip lights or portable runway lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway
5 - Instrument approach
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs
NOTE: Any S combination without parenthesis guarantees only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis indicates only part time or irregular attendant.

FUEL OCTANE

Civil Fuel:		Army and Navy Fuel:	
F1:	73/80 oct.	A+:	145 oct.
F2:	73/80, 91 oct.	A :	100 oct.
F3:	73/80, 91, 100 oct.	B :	91 oct.
NOTE: If only 91 or 100 octane available, this octane cited, and not coded.		C :	73/80 oct.
		J :	JP-1

REMARKS

(a) "CLOSED" indicates closed to all transient aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.

(b) "INACT-NO FACS." indicates USAF and/or Navy airfields which are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the Organization to which the acft is assigned.

(c) "CIVIL SVCG ONLY" indicates municipal airfields used jointly by the USAF and/or Navy and civil interests at which the USAF or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is available.

(d) STATUS UNKNOWN: These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

(e) ABANDONED: Reverted to non-airport usage, such as farming or grazing.

(f) "FEE" indicates landing charges for revenue producing aircraft.

(g) "+" indicates additional data will be found in Notices to Airmen Section.

(h) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

NOTES

1. → New or revised data.
2. SCHEDULES AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Offer no public service for profit and solicit no public patronage. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
NOTE: "Blkd" indicates approaches where glide angle to runway is 3:1 or less.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

AIRPORT NAME ABBREVIATIONS

AFB - U. S. Air Force
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Andrews Air Force Base, Flight Information, Director of Operations.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U.S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A.F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", to A.F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications,", and A.F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of August 28, 1947, U.S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Fairfield-Suisun AFB, California.

BERMUDA: Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Arpt., D.C.; Selfridge AFB, Mich.; or Westover AFB, Mass.

CANAL ZONE, CENTRAL AMERICA, MEXICO, and SOUTH AMERICA: March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla.

ENGLAND, GREENLAND, ICELAND, and NORTH IRELAND: Washington National Arpt., D.C., or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Arpt., D.C.; Westover AFB, Mass., or Kelly AFB, Texas.

HAWAII: Fairfield-Suisun AFB, Calif.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Arpt., D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

✓ LISTING OF LOCATION OF PLAN 62 INTERPHONE FACILITIES: The location of each Plan 62 interphone connection to Flight Service is indicated in the Directory of Airports section of A.N. 08-15-1. When closing or filing flight plans with Flight Service, pilots should check availability of interphone before placing long distance phone calls.

CHANGE IN VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, AND COAST GUARD: Listed below are Standard VHF Channels for the Air Force, Navy, and Coast Guard:

AIR FORCE*	NAVY	COAST GUARD	SERVICE
A...140.58			CAA Airways (Range Station)
	1-A...121.5	1...121.5	Military Emergency
B...126.18	2-B...142.74	2...142.74	Control Towers
C...137.88	**3-C...132.3	3...132.3	Military Airways (a) USAF Alternate Control Towers
D...121.5			Military Emergency (a) USAF GCA (IFR or emergency)
	Guard D...140.58	Guard D...140.58	CAA Airways (Range Station)
E...( )	4-E...( )		Tactical or as required —
		4...118.1	International airdrome control towers
F...( )	5-F...( )		Tactical or as required
		5...143.28	General Communications
G...137.70		6...143.64	GCA
	6-G...( )		Tactical or as required
H...134.1	7-H...142.02	7...142.02	GCA
	8...134.64	8...134.1	GCA
	9...126.18	9...126.18	Control Towers
U...108.3			ILS localizers and VAR ranges
V...108.7			"
W...109.1			"
X...109.5			"
Y...109.9			"
Z...110.3			"

(a) Available for service indicated on secondary basis.

* Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

** 137.88 authorized as interim frequency pending receipt of crystals. In 4-channel set-ups 126.18 and 142.02 mc may be substituted in accordance with operational requirements.

PORTABLE TRAFFIC CONTROL LIGHT SIGNALS: The attention of Air Force personnel is directed to CAA's Flight Information Manual, Volume 4, Number 1, dated August 1,1949, subject, "Portable Traffic Control Light Signals". Procedure listed is to be incorporated in "ANC Procedures for the Control of Air Traffic", and in the interim, Air Force personnel will comply with listed procedures.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see

pages 90 through 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communication services, particularly when standard low frequency facilities are not available.

ADVISORY REGARDING GCA MINIMUMS DURING APPROACH: USAF Regulations require all USAF GCA final controllers to advise aircraft when they are passing through the published GCA minimum established for a specific base. This advisory is intended for the sole purpose of re-emphasizing the pilot's responsibility with regard to field minimums.

USAF AND NAVY GCA CHANNELS: To enable U.S. Navy aircraft to land at A.F. installations during IFR and to communicate with USAF aircraft not equipped on 121.5 mc, all USAF GCA installations will for the next 30 to 60 days maintain one channel on frequency 140.58 mc simultaneously with 121.5 mc. Contact with Navy GCA stations or towers by USAF aircraft should be attempted on Channel D (121.5 mc) where other standard channels do not exist. If contact cannot be made on Channel D (121.5 mc) due to lack of crystals, either in aircraft or ground installations channel "A" (140.58 mc) may be used during the interim period until crystals are available for 121.5 mc in all military installations. (9-13)

APPROVAL OF INSTRUMENT APPROACH PROCEDURES FOR AIRPORTS LOCATED IN EXCESS OF SEVEN MILES FROM THE RANGE STATION: In accordance with minutes of Airspace Subcommittee Meeting No. 131, instrument approach procedures may now be approved for airports located in excess of seven miles from the associated radio facility, but such procedures will be governed by following criteria:

a. From 7 to 10 miles, visibility not less than 2 miles and ceiling not less than 500'.
b. From 10 to 12 miles, visibility not less than 2 miles and ceiling not less than 700'.
c. Twelve miles or over, operations shall be conducted in accordance with visual flight rules from radio range facility. Air Force procedures utilizing contact courses have recently been disapproved. If cancellation affects operation, new procedure should be submitted in accordance with AF Letter 55-6 and above criteria.

ATTENTION ALL CLEARANCE AUTHORITIES - CLEARANCE OF JET AIRCRAFT: Headquarters, U.S. Air Force has directed dissemination of the following policy regarding clearance of jet aircraft:

"THE INSTRUMENT LETDOWN PROCEDURES CONTAINED IN USAF PILOT HANDBOOK - SPECIAL JET - UNITED STATES, ARE APPLICABLE IN THE SAME SANSE AS THOSE OUTLINED IN PARAGRAPH 37, A.F. REGULATION 60-16, JULY 11, 1949".

CANADIAN STATION RETENTION OF 116.1 MC: All Canadian stations listed in A.N. 08-15-1 will retain frequency 116.1 mc until further notice. Frequency changeover of international emergency frequency 121.5 mc to replace present military emergency frequency 140.58 mc will not be accomplished until approximately November 1, 1949.

✓ CORRECTIONS AND AMENDMENTS TO A.N. 08-15-1: (1) Correct pages 41 and 41A, by showing non-compulsory reporting point at intersection of E crs Allentown, Pa., and SW crs Newark, N.J. Intersection will be known as "New Brunswick".

(2) Correct page 8, by showing Rivers, Man. control tower and RCAF Air/Gnd sta operating from 0830 to 2000.

(3) Correct page 49, under Amber Airway No. 3, by showing the minimum enroute alt. of 11,000' between Trinidad Range Station and Las Vegas Range Station.

(4) Correct listing under Greenville AFB, S.C., by adding to remarks: CLOSED.

(5) Correct page 25, by showing Megantic radio range courses as 105°,176°,285°,359°. (This corrects Airman's Guide, Vol. 4, No. 15, dated Oct. 11, 1949)

✓ CORRECTIONS AND AMENDMENTS TO T.O. 08-15-3: (1) The following ADF procedure authorized for Otis AFB, Mass., using Otis Homer; Freq. 269 kc; Ident AUA; Initial approach from Providence radio range sta, out E crs at 2000'; Shuttle: NE of Homer courses of 230° and 50°; Final approach course: 230°; Procedure turn: To left after 1 minute from homer, within 10,15 mi.-1000', 20,25 mi.-1500'; Low cone: 615'; Min. alt. over arpt: 615'; Dist, Homer to airport: 0 miles. If landing not accomplished or ground contact not established within 1/2 miles after passing homing facility, proceed out 270° course, climb to 2000'; Minimum ceiling: 500'; Remarks: Approach from E course of Providence Range to Otis Homer (AUA 269) system now in use by Central Instrument School. H fac. operates on request only. Otis control tower must be called as soon as contact can be made, requesting operation of H facility. (This also corrects PHACUS).

(2) Correct Instrument Approach Procedures as follows:

(a) The following procedure authorized: Ellington AFB, Texas, utilizing Houston, Texas range; Freq. 332 kc; Ident HOU; Initial approach alt.: E - 1600' (BUJ range sta); SE-1300' (GLS range sta); SW-1500' (Int. S crs RIM range sta); NW-1600' (Int. NE crs RIM range sta); Shuttle: NW crs; Final approach crs.: NW; Complete procedure turn on W side of NW crs within 10,15,20,25 mi.-1600'; Low cone: 700'; Mag. bearing and dist. sta to fld: 91°, 4.9 mi.; Min. alt over arpt: 539'; Missed approach procedure: If landing not accomplished or ground contact not established proceed out on a heading of 100° climb to 1600'; Remarks: GCA will identify and track aircraft from Houston FM-Reidentify over Low Cone and turn to 100° magnetic and establish Base & Final approach leg and land aircraft.

(b) Big Spring, Texas: Missed approach procedure: Climb to 4000' on E crs within 25 miles, or alternate procedure (when directed by ATC), climb to 4000' on SE crs within 25 miles.

(c) Miami International, Fla.: Change Initial approach alt. to N-1300' (Int W crs West Palm Beach). Missed approach procedure: Climb to 1400' on E crs or alternate procedure (when directed by ATC), turn right and climb to 1400' on SE crs.

(d) Boise, Idaho: Change ceiling over field: 600'. Min. alt. over airport: 3458'.

(e) Tulsa, Okla.: Change Initial approach alt to SE-Min. enroute alt. Min. alt. authorized after passing marker or Int.-delete from SE and SW. Low cone: 1300'. Complete procedure turn within 10 mi-1800'; within 15,20 and 25 mi-2000'. Missed approach procedure: Climb to 2200' on SW crs within 25 miles, or alternate procedure (when directed by ATC), turn right and climb to 2200' on NW crs within 25 miles.

(f) Page 46, Des Moines: Inbound heading on S crs 003°.

(g) Page 129, Quonset Point, R.I.: Inbound heading on W crs 086°, on E crs 266°.

(h) Page 155, Texarkana, Ark.: Outbound heading on W crs 248°.

(i) The following Instrument approach procedures - Contact courses - are cancelled and/or not authorized for A.F. use and to be deleted from this publication and PHACUS: Casper AFB, Wyo., Casper Range; McClellan AFB, Calif., Sacramento Range; Muroc AFB, Calif., Palmdale Range; Offutt AFB, Nebr., Omaha Range; Napier Field, Ala., Dothan Range; Standiford Field, Ky., Louisville Range; Oakland, Calif., Oakland Range; Palmdale, Calif., Palmdale Range; Pensacola Mun., Fla., Pensacola Range; San Diego, Calif., San Diego Range.

(j) Biggs AFB, El Paso, Texas: Delete words "Contact course" from procedure and substitute: "VFR".

(k) Las Vegas AFB, Nev.: Missed approach procedure: Climb on NE crs within 20 mi to 7000' and on SW crs within 20 miles to 9500'.

(l) Wardwell Field to Casper AFB - Bearing and distance: 256°, 4.9 miles.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D.C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C.

All Naval Air Stations and Air Facilities are directed to notify the U.S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D.C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 of March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U.S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

NAVY and U.S.A.F. GCA CHANNELS: See item under Air Force Special Notices, entitled, "U.S.A.F. and Navy GCA Channels":

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the otherhand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standarization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention, W-155, C.A.A., Washington 25,D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide. District Airport Engineer addresses are listed in the Notices to Airmen section.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitations, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions) carried in the Notice to Airmen section are facility coordinates, post deadline data, airports closed because of construction, abandoned or reported abandoned, or data impossible to incorporate in the two above tabulations.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents and individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D.C.

CIVIL USAGE OF MILITARY FIELDS: U.S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the commanding officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400 feet and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Air Force, Navy, Army, and Coast Guard aircraft.

Under the present Air Force expansion program, the Air Force is activating or re-activating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

NOTE: Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

NEW YORK-CHICAGO VOR AIRWAY: This airway operates on an experimental basis. Aircraft equipped to use VOR facilities may be cleared to conduct flight on the New York-Chicago VOR Airway.

Standard operating procedures for VHF omniranges (VOR) during the transition period when both VOR and low-medium frequency ranges are in use have been developed. These procedures contain the phraseologies which will be used by air traffic controllers in clearing flights to operate via the VOR facilities. A chart of the New York-Chicago VOR Airway has been prepared by the Coast and Geodetic Survey. Copies of the procedures and the chart may be obtained from either the New York or the Chicago CAA Regional Office.

✔ CAA AIRWAY COMMUNICATIONS STATIONS TO GUARD 126.7 MC:

Receiving watch on 3117.5 kc, airline frequency, will be discontinued by all CAA airway communications stations on April 1, 1950. Beginning September 1, 1949, the installation of a receiving watch on 126.7 mc, airline enroute frequency, by CAA airway communications stations was started.

By November 1st, all CAA stations will be guarding 126.7 mc.

NOTE: Effective November 1, 1949, CAA control towers will guard 3117.5 kc only on request. Guard will be established within ten minutes after request received.

PROPOSED DISCONTINUANCE OF 111.1 MC BY AIRWAY COMMUNICATIONS STATIONS DEFERRED: Proposed discontinuance of 111.1 mc transmitting frequency by CAA airway communications stations has been deferred. All pre-advertised discontinuances by Airway Communications Stations should be disregarded. (10-25-49)

OMNI-RANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CAA AIRWAY COMMUNICATIONS STATIONS DISCONTINUE USE OF 116.1 MC: Effective September 1, 1949, with the discontinuance of 116.1 mc in the continental United States by the National Military Establishment, CAA Airway Communications Stations discontinued transmitting on and guarding of that frequency.

Substituted therefore is 140.58 mc for communication between military aircraft and CAA Airway Communications Stations. After September 1, 1949, military stations and aircraft will use 121.5 mc, the international VHF emergency frequency, for their emergency frequency.

NOTE: **140.58 mc should not be used by any civil aircraft. It is intended solely for military aircraft use.**

✓ **NON-STANDARD HOLDING PATTERNS: Effective immediately the following non-standard holding patterns are established: Bismarck Range - Direction of holding: East; Left turns on S side of E course Bismarck; Time: 2 minutes. Louisville Range - Direction of holding: East; Left turns on S side of E course Louisville; Time: 2 minutes.**

The following non-standard holding pattern is discontinued: Non-standard holding pattern at Wolf Creek Intersection (SW course Dayton ILS and W course of Patterson).

✓ **DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective November 1, 1949, unless otherwise advised:**

AMENDMENT NO. 15

(1) The CHINA LAKE, CALIFORNIA, listing is amended by changing the "Time of Designation" column to read: "Daily, from 1/2 hour after sunrise to 1/2 hour before sunset".

(2) The SCENIC, SOUTH DAKOTA, listing is amended by changing the "Using Agency" column to read: "Kearney AFB, Nebr., and Rapid City AFB, S.D.".

(3) A FORT BLISS, TEXAS, area is added to read: Location: Fort Bliss (Roswell Chart) Description: Beginning at lat 32-25-00N, long. 105-50-00W; thence southerly to lat 32-03-00N, long. 105-53-00W; WSW to lat 32-00-00N, long. 106-02-00W; due W to long. 106-10-30W; northerly to lat 32-05-20N, long. 106-09-20W; westerly to the Southern Pacific RR at lat. 32-06-00N, long. 106-15-30W; northeasterly following the railroad to lat 32-28-00N, long. 106-02-00W; ESE to lat 32-25-00N, long. 105-50-00W, point of beginning. Altitudes: Surface to 69,000 feet. Time: Daily, sunrise to sunset. Using agency: Fort Bliss, Texas.

(4) A KAHUKU, OAHU, HAWAII, area is added to read: Location: Kahuku, Island of Oahu (Hawaiian Islands Chart). Description: Beginning at lat 21-41-08N, long. 157-59-40W; S to lat 21-40-00N, long. 157-59-59W; SE to lat 21-36-59N, long. 157-56-02W; NE to lat. 21-37-38N, long. 157-55-31W; NW to lat 21-40-23N, long 157-57-42W; WNW to lat. 21-41-08N, long. 157-59-40W, point of beginning. Altitudes: Surface to 21,000 feet. Time: Daylight and darkness, as indicated in Notices to Airmen. Using agency: Army Ground Forces, Pacific.

(5) A SCHOFIELD, OAHU, HAWAII, area is added to read: Location: Schofield, Island of Oahu (Hawaiian Islands Chart). Description: Beginning at lat 21-29-03N, long. 158-08-02W; ENE to lat 21-29-57N, long. 158-05-03W; N to lat 21-31-00N, long. 158-05-07W; NW to lat 21-32-39N, long. 158-06-17W; SW to lat. 21-29-03N, long. 158-08-02W, point of beginning. Altitudes: Surface to 12,000 feet. Time: Daylight and darkness, as indicated in Notices to Airmen. Using agency: Army Ground Forces, Pacific.

NOTE: See page 73 for additional DANGER AREA DESIGNATIONS.

✓ **FLIGHT INFORMATION MANUAL CORRECTIONS AND AMENDMENTS: Correct Flight Information Manual, Vol. 4, No. 1, dated August 1, 1949, as follows:**

(1) Page 164, under Abilene, Texas, Abilene Mun. Arpt #2: (a) Change ceiling and visibility minimums as follows: S: 500', 1.5 - 500', 2.0; A: 800', 2.0 - 800' 2.0. (b) Change remarks column to read: Climb to 3800' on S course within 10 mi.*, or alternate procedure (when directed by ATC), turn left, climb to 3000' on E crs within 25 mi. *CAUTION: 2754' MSL radio twr, 11 mi S of arpt.

(2) Page 164, under Advance, Mo.: (a) Change Initial approach from S to: 2000' (Memphis Range). (b) Change ceiling and visibility minimums as follows: S: 500', 1.5 - 500', 1.5; A: 800', 2.0 - 800', 2.0. (c) Add note to remarks column: For emergency use only by large aircraft.

(8) Page 164, under Akron, Colo.: (a) Change Initial approach from the S to: 6000' (E crs Thurman VAR). (b) Change ceiling and visibility minimums as follows: S: 500', 1.0 - 500', 1.5; A: 800', 2.0 - 800', 2.0. (c) Add following note to remarks column: Heavy acft use with caution.

(4) Page 165, under Altoona, Pa.: Amend ceiling and visibility minimums as follows: R: 1000', 2.0 - 1000', 2.0; S: NA - NA; T-1000', 1.0 - 1000', 1.0.

(5) Page 168, under Big Spring, Texas: (a) Change alternate ceiling and visibility minimums to: 800', 2.0, day and night. (b) Change remarks column to: Climb to 4000' on E crs within 25 mi., or alternate procedure (when directed by ATC), turn right, climb to 4000' on SE crs within 25 miles.

(6) Page 169, under Boise, Idaho: (a) Change initial approach from the SE to: 9000' (W crs Burley). (b) Change ceiling and visibility minimums as follows: R: 600', 1.5 - 700', 1.5; S: 600', 1.5 - 700', 1.5; A: 800', 2.0 - 800', 2.0. (c) Change remarks column to: Turn right and climb to 4000' on NW crs within 10 mi. High terrain 8 mi N of NW crs; 10 mi S of range on SE crs.

(7) Page 171, under Charleston, S.C.: (a) Add secondary approach from W: 600' (Summerville FM)(Final). (b) Change alternate ceiling and visibility minimums to: 800', 2.0, day and night. (c) Change remarks column to: Climb to 1500' on E crs, or alternate procedure (when directed by ATC), turn right, climb to 1300' on SW crs.

(8) Page 172, under Charlotte, N.C., Douglas Field: (a) Change ceiling and visibility minimums to: S: 500', 1.5 - 500', 1.5; A: 800', 2.0 - 800', 2.0. (b) Change remarks column to: Climb to 2500' on N crs, or alternate procedure (when directed by ATC), turn right and climb to 2200' on E crs within 25 mi. *1116' MSL twr lctd 4 mi SE of range and 2.3 mi. E of S crs.

(9) Page 173, under Cochise, Ariz.: Change alternate ceiling and visibility minimums to: 1000', 2.0 (BCOB), day and night.

(10) Page 173, under Colorado Springs, Colo.: (a) Change ceiling and visibility minimums to: R #800', 1.5 - #800', 2.0; S: #800', 1.5 - #800', 2.0; A: 800' 2.0; T: 300', 1.0 - 300', 1.0. (b) Change remarks column to: Climb to 8000' on S crs within 25 mi. *Climb to be made to 8700' before proceeding out N crs to accomplish lowering down through procedure. #Stall speed formula not applicable. 800-1 authorized for acft having Stall speeds of 75 mph or less, day only.

(11) Page 174, under Corpus Christi, Texas, Waldron NAAS: (a) Insert asterisks in ceiling and visibility minimums columns. (b) Change remarks column to: Turn left and climb to 1500' on S crs. *This airfield is inactive; procedure is for daylight emergency use only.

(12) Page 177, under Dothan, Ala., Dothan Arpt: (a) Change min. initial approach alt. from the SW to: 1500' (E crs Crestview); change initial approach from the NW to: 1600' (E crs Maxwell). (b) Change alternate ceiling and visibility minimums to: 800', 2.0, day and ngt.

(13) Page 179, under Engle, N.M.: (a) Change ceiling and visibility minimums to: R: 700', 1.5 - 700', 2.5; S: 700', 1.5 - 700', 2.5. (b) Change remarks column to: Climb to 10,000' on S crs within 25 miles.

(14) Page 179, under Fairfield-Suisun, Calif.: Change min. initial approach alt from the N to: 4000' (Williams Range).

(15) Page 181, under Ft. Myers, Fla., Page Field: Change alternate ceiling and visibility minimums to: 800', 2.0, day and night.

(16) Page 182, under Gila Bend, Ariz.: Change ceiling and visibility minimums as follows: R: 700', 1.5 - NA; S: 700', 1.0 - NA; A: 800', 2.0 - NA; T: 300', 1.0 - NA.

(17) Page 185, under Houston, Texas, Houston Arpt (Procedure No. 1): (a) Add secondary approach from the NW: 1300' (Houston FM). (b) Change alternate ceiling and visibility minimums to: 800', 2.0, day and night. (Procedure No. 2): (a) Change distance, from Houston FM to arpt to 5.6 mi. (b) Change alternate ceiling and visibility minimums to: 800', 2.0, day and night.

(18) Page 185, under Huron, S.D.: Change ceiling and visibility minimums to: R: 500', 1.5 - 500', 2.0; S: 500', 1.5 - 500', 2.0; A: 800', 2.0 - 800', 2.0.

(19) Page 188, under Klamath Falls, Ore.: Change ceiling and visibility minimums to: R: 1900', 2.0 - 1900', 2.0; S: 1900', 2.0 - 1900', 2.0; A: 2000', 3.0 - 2000', 3.0; T: 1000', 1.0 - 1000', 2.0.

(20) Page 189, under Las Vegas, Nev., McCarran Field: (a) Change shuttle to: To 7000' on NE and SW courses within 20 mi. (Turns to S). (b) Change ceiling and visibility minimums to: S: 1500', 2.0 - 1500', 2.0; A: 1500', 2.0 - 1500', 2.0. (c) Change remarks column to: If not contact over range, climb to 7000' on NE crs within 20 miles.

(21) Page 190, under Lone Rock, Wis.: (a) Change min initial approach alt from the E to: 2500' (Madison Range). (b) Add note to remarks column: DC-3 and lighter acft only.

(22) Page 191, under McChord (Tacoma), Wash.: Change take-off ceiling and visibility minimums to: 500', 1.0 - 600', 2.0.

(23) Page 192, under Miami, Fla.: (a) Change initial approach from the N to: 1300' (W crs W. Palm Beach). (b) Change alternate ceiling and visibility minimums to: 800', 2.0, day and night. (c) Change remarks column to: Climb to 1400' on E crs, or alternate procedure (when directed by ATC), turn right, climb to 1400' on SE crs.

(24) Page 196, under New York, N.Y., La Guardia Field (Procedure No.1): (a) Change alternate minimums to: 800', 2.0, day and night. (b) Change remarks column to: Climb to 1500' on SW crs. *Descent to cross range at 800' may be started only if New Rochelle FM is received. Straight-in approach to Rwy #22 only.

(25) Page 199, under Palmdale, Calif., Los Angeles Co. Arpt: (a) Change initial apprch from the SW to: 9000' (Newhall Range). (b) Change straight-in minimums to: 1000', 2.0, day and night. (c) Change remarks column to: If not contact over range, make 180° right turn (N) and climb to 6000' on NE crs within 16 mi. High terrain 5 mi SW of arpt. *Danger Area 16 mi NE of range - make procedure turn within 15 miles.

(26) Page 202, under Pueblo, Colo., Pueblo Arpt: (a) Change ceiling and visibility minimums to: S: 500', 1.5 - 500', 2.0; A: 800', 2.0 - 800', 2.0. (b) Change remarks column to: Turn right and climb to 6000' on E crs within 25 mi, or alternate procedure (when directed by ATC), climb to 8000' on N crs. *If contact is not established at 6000' prior to reaching range, climb to 6600' on S crs within 10 mi for procedure turn. **If procedure turn is accomplished beyond 10 mi, the alt on final approach is 6100'.

(27) Page 204, under Rock Springs, Wyo.: Change ceiling and visibility minimums to: S: 500', 1.5 - 500', 2.0; A: 800', 2.0 - 800', 2.0.

(28) Page 206, under San Diego, Calif., Lindbergh Field: (a) Change procedure turn min alt to 2000' at all given distances. (b) Change ceiling and visibility minimums to: S: 700', 2.0 - 700', 2.0; A: 800', 2.0 - 800', 2.0.

(29) Page 207, under Savannah, Ga., Hunter Field: (a) Change minimums to: S: 500',1.5 - 500', 1.5; A: 800', 2.0 - 800', 2.0. (b) Change remarks column to: Climb to 1300' on NE crs, or alternate procedure (when directed by ATC), turn left, climb to 1300' on NE crs.

(30) Page 211, under Tallahassee, Fla.: (a) Change initial approach from the N to: 1400' (Albany Range). (b) Change alternate minimums to: 800', 2.0, day and night. (b) Change remarks column to: Climb to 1400' on E crs, or alternate procedure (when directed by ATC) turn left and climb to 1400' on N crs.

(31) Page 211, under Terre Haute, Ind., Cox Arpt: (a) Add minimums as follows: R: 800', 1.5 - NA; S: 800', 1.5 - NA; A: 800', 2.0 - NA; T: 300', 1.0 - NA. (b) Change remarks column to: If not contact over range, climb to 2000' on E crs.

(32) Page 212, under Tri-City (Bristol), Tenn.: Change minimums to: R: 800', 1.5 - 800', 2.0; S: 800', 1.0 - 800', 1.0; A: 1000', 2.0 - 1000', 2.0.

(33) Page 216, under Wichita, Kans.: (a) Change minimums to: S: 500', 1.5 - 500', 1.5; A: 800', 2.0 - 800' 2.0. (b) Change remarks column to: Climb to 2500' on S crs; or alternate procedure (when directed by ATC), climb to 3000' on SW crs. Rwys 6L and 24R not authorized for night take-offs.

(34) Page 216, under Wichita Falls, Tex.: (a) Change minimums to: S: 500', 1.0 - 500', 1.5; A: 800', 2.0 - 800', 2.0. (b) Change remarks column to: Climb to 2500' on NW crs within 25 mi., or alternate procedure (when directed by ATC), turn right and climb to 2500' on NE crs within 25 miles.

(35) Page 217, under Winston-Salem, N.C.: Delete secondary approach from the SW: 2000' (High Point FM) (Final), and add it as a secondary approach from the SE.

(36) Page 217, under Yakima, Wash.: Change initial approach from the NE to: NA (Danger Area); add secondary approach from the NW: 4000' (S crs Ellensburg).

(37) Page 217, under Yuma, Ariz.: (a) Change minimums to: R: 600', 1.5 - NA; S: 600', 1.5 - NA; A: 800', 2.0 - NA; T: 300', 1.0 - NA.

(38) Page 30, under Dothan, Ala., CAA station, telephone number should read: 3-8730.

(39) Page 30, under Miami, Fla., CAA station, telephone numbers should read: INSAC 88-1531, 88-3969; OFACS 88-3462(day), 88-2361(night);International NOTAM Office 88-3463(day), 88-6094(night).

(40) Page 30, under Tampa, Fla.. CAA station, telephone number should read: 80-2521.

(41) Page 33, under Raleigh, N.C., CAA station, telephone number Durham L-990 should be deleted.

(42) Page 32, under Vicksburg, Miss., CAA station, telephone number should read: 1406.

(43) Page 34, under Greenwood, S.C., CAA station, should be deleted as this is the correct listing for Greenwood, Miss.

(44) Page 50, under Clementon, N.J., lat. and long. are reversed; correct to read: 39-49-00, 74-58-30.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Needles Instrument Approach Chart - AL-543. dated June 2. 1949, under "TIME IN MINUTES AND SECONDS TO AERODROME DISTANCE 1.9 STAT. 1.6 NAUT. MILES", by showing the computation for a speed of 100 knots as 00:58

(2) Correct Radio Facility Chart No. 12, by changing Green Bay Radio Station WTAQ to WBAY

(3) Correct Radio Facility Chart Nos. 35 and 35A, as follows:(a) Washington, D.C., and Largo, Md.: Radio ranges also receive on 126.7 mc. (b) Brandywine, Md.: Radio Range transmitting on 379 kc decommissioned.

(4) Correct Radio Facility Chart No. 35, by showing Arcola, Va. Radio Range also receiving on 126.7 mc.

(5) Correct Radio Facility Chart No. 35A, as follows: (a) Washington, D.C. Tower: Also transmits and receives on 119.1 mc. (b) Mt. Vernon, Va.: FMHW identification changed to MTV.

(6) Correct Los Angeles Sectional Aeronautical Chart, dated Feb. 24, 1949, by deleting Searchlight Airport at lat. 35-17-45, long. 114-53-00. This airport has been abandoned.

(7) Correct Mt. Whitney Sectional Aeronautical Chart, dated Feb. 18, 1949, as follows:

(a) Add Glendale, Nevada, lat. 35-17-45, long. 114-34-15; elev.: 1480'; longest landing strip: 2700' NW/SE. No lighting available.

(b) Add Mesquite, Nev., lat. 36-48-15, long. 114-03-00; elev.: 1770'; 2 landing strips, both 1650' long. No lighting available.

(c) Delete railroad tracks from Death Valley, Calif., to Beatty, Nev.

(d) Delete railroad tracks from Sodaville (North of Coaldale, Nev.) to Goldfield, Nev., via Tonopah, including the branch line S from Blair Junction. (This line should also be removed from the Reno Sectional Aeronautical Chart).

(e) Delete railroad tracks from Benton Station (North of Bishop, Calif.) N through Basalt, Nev. to Sodaville, Nev. (This line should also be removed from the Reno Sectional Aeronautical Chart).

(8) Correct Reno Sectional Aeronautical Chart, dated Feb. 16, 1949, as follows:

(a) Delete railroad tracks from Wabuska, Nev., through Yerington, Nev., to Ludwig, Nevada.

(b) Delete railroad tracks from Austin N to Battle Mountain, Nevada.

(9) Correct Direction Finding Charts DF 21, dated June 1, 1949 and DF 24, dated June 15, 1949, by adding radio facilities of St. George, Bryce Canyon, and Hanksville, Utah and other VHF facilities along Red Airway #6.

✓ ATC AREA BOUNDARY REVISIONS: (1) Effective immediately the following control boundaries are established: Green 3 (Cleveland-New York) - 15 miles W of Brookville, Pa. Red 8 (New York-Pittsburgh) - along S edge of Green Airway #3. Red 85 (Cleveland-Pittsburgh) - 25 miles SE of Akron Range Station. Blue 2 (Cleveland-Pittsburgh) - 15 miles N of Butler HW. Blue 21 (Cleveland-Pittsburgh) - along the N edge of Red Airway #85.

(2) Correct Pilot's Guide, Vol. 4, No. 15, page 59, ATC Area Boundary Revision to read: Detroit-Cleveland ATC Boundary instead of Detroit-Toronto ATC Boundary.

✓ DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, COMPULSORY REPORTING POINTS, CONTROL AREAS, CONTROL AREA EXTENSIONS, AND CONTROL ZONES: See page 72 for amendments.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power

failures or course misalignments, and lighting facilities are temporarily inoperative. These temporary conditions cannot be given immediate coverage in the "Airman's Guide", but Teletype Notam services gives the desired coverage on any facility or field at which teletype facilities are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Stations Operations Offices having teletype drops.

WEATHER REPORTING SERVICE

Weather Reporting Location	Change in Weather Service
Wilmington, Ohio (Clinton Co. AFB)	Hourly, Pibal and Raob reports discontinued

NOTE: 6-hourly reports will soon be available from Seattle-Tacoma Airport in lieu of Boeing Field, Seattle, Washington.

AIRPORT AND RADIO NOTICES

LEGEND

** - new or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - new or revised radio data to be inscribed on charts or added to records.

NOTE: Because of space limitations such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: SPECIAL NOTICE: The address of the CAA District Arpt Engineer is Old Post Office Bldg., Montgomery, Ala.

**ANDALUSIA ARPT: Correct lat. 31-16-30, long. 86-28-30. (10-3)

**BIRMINGHAM ARPT: 216' obst lgtd twr Rdo Stn WEDR erected 8 mi SW (222°T) at lat. 33-28-39, long. 86-50-57. (9-21) 2-way rdo rqrd ngts, rcvr days. (9-24)

BROOKLEY AFB(MOBILE): All GCA runs will pull up at 1/2 mi from end Rnwy 14-32. Rnwy 14-32 clsd except emerg-due const. (9-27)

CLANTON-GRAGG ARPT, SITE 27, MEM-TPA: Ctn, const.: equip. on fld. Graded areas hazardous. (9-9)

★CRAIG AFB (SELMA)-RADIO: USAF rng transmits 272 kc, 126.18 mc. Grds 3105,4495 kc, 126.18 mc. (10-10)

**DOTHAN-NAPIER ARPT: 150' water tanks S of fld. (10-18)

**FAYETTE ARPT: 240' obst lgtd twr Rdo Stn WWWF erected 2.5 mi S (180°T) at lat. 33-40-40, long. 87-48-30. (9-1)

FT. MORGAN AIRFIELD: New fld under const approx lat 30-13-30, long. 88-00-30. Unusable. (6-6)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi 3 looks like arpt and lgts give impression of parallel rnwys. (1-17)

MOBILE-BATES ARPT: Equip. on fld, const. Use r nwys only. 40' antenna mast 400' E of NW end of NW/SE Rnwy. (9-3)

MUSCLE SHOALS-RADIO: Ctn advised on VHF omnirng thru northern section within 20° E and W mag. north where severe course indicator roughness is present. (6-30)

SELMA-SELFIELD ARPT: Ctn, equip. on fld. (9-9)

**TROY ARPT, SITE 35A, MEM-TPA: Oct. 17, comm as a PD site consisting of a 24" duplex, 6 rpm, flash. six clear and six green per min. mounted on a 75' twr with an internally lgtd windcone 2 lgtd Rnwys N/S 150 x 5000' and E/W 150 x 5000' and 1 unlgtd rnwy NW/SE 150 x 5000'. (10-28)

[redacted]: SPECIAL NOTICE: The address of the CAA District Arpt Engineer is 707-1/2 W. Thomas Road, Phoenix, Arizona.

DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (9-6). Rnwy 8-26 clsd. (9-29)

FLAGSTAFF: Demolition opers in progress approx 5 mi W, daily, Mon thru Fri. Danger up to 10,000' MSL in area bounded as follows: N - Hwy 66; E - Riordan, Ariz.; S - Syca-[redacted] more Canyon; W - Garland Prairie

GILA BEND AF AUX: All obsts except 209' twr 1/2 mi S of fld not lgtd. (9-13)

**GLOBE-CUTTER ARPT: Correct lat 33-20-45, long. 110-40-30. (6-24)

**KINGMAN ARPT: 200' obst lgtd antenna mast Rdo Stn KGAN erected 6 mi SW (227°T) at lat 35-11-48, long. 114-01-18. (10-3)

PHOENIX: Exten trng on Phoenix Rng on all courses except W. (6-2)

PHOENIX-RADIO: Soon, apch control procedures will be placed into effect. (9-30)

PHOENIX-SKY HARBOR ARPT: All taxiways except N of E/W Rnwy clsd. Rnwys 8R-26L, NE/SW clsd. (8-4)

YUMA COUNTY ARPT: Bcn inop. Const. along N 1000' Rnwy 17-35 and W 1000' Rnwy 8-26. (10-19)

[redacted]: SPECIAL NOTICE: The address of the CAA District Arpt Engineer is Adams Field, P.O. Box 1397, Little Rock, Ark.

FORT SMITH-RADIO: VHF omnirng on 113.1 mc unreliable. (10-15)

FORT SMITH ARPT: Rnwy lgtg sys inop. E/W Rnwy will be lgtd by smudge pots until 2200, no lgts after 2200. Black top portion W end of E/W Rnwy unsafe for acft of twin engine size or larger. (8-18)

HELENA-THOMPSON-ROBBINS ARPT: Inten pilot trng in crop dusting days. Ctn, mounds of gravel along W side N/S Rnwy. (9-16)

LITTLE ROCK-RADIO: About Nov. 8, NW crs LF rng will be realigned from 112° to 106°. (10-21)

LITTLE ROCK-ADAMS ARPT: 150' smoke stack being erected 2100' NW of intxn of N/S and NW/SE Rnwys. (9-1)

PINE BLUFF-RADIO: Courses aligned by grnd-check only. (5-20)

SEARCY ARPT: Gully 1' deep lctd 300 yds from S end across N/S Strip. (9-28)

TEXARKANA-RADIO: About Nov. 8, NW crs LF rng will be realigned from 123° to 163°; SE crs will be realigned from 303° to 343°. (10-22)

WALNUT RIDGE-RADIO: LF rng courses aligned by grnd check only. (4-11)

[redacted]: SPECIAL NOTICE: CAA District Airport Engineers addresses are: (So. of Fresno) 5651 W. Manchester Ave., Los Angeles 45, Calif.; (Fresno & North) 206 Appraisers Bldg., 630 Sansome St., San Francisco 11, Calif.

ALAMEDA NAS: Maint high apch on Rnwys 26L and 21, hvy acft parked these areas.(8-15)

BAKERSFIELD-KERN CO. #1 ARPT: 15' bldg 300' N of apch end Rnwy 30 and E of N/S Taxi Strip. Const between apch end Rnwy 25 and E/W Taxi Strip just W of N/S Taxi Strip, mrkd. Use rnwys, taxi strips only. (9-3)

BURBANK-LOCKHEED AIR TERMINAL-TOWER: Soon, CAA ILS lclzr and OMK will be comm on test basis until approx Nov. 10. Lclzr freq: 109.5 mc, channel X lctn: 150' W of W end E/W rnwy. Ident: "BUR". OMK freq 359 kc, ident.: "BU" lctd 4.44 mi W of W end E/W rnwy (on back course lclzr) (10-4) FLD: Clsd to all trans P-80 acft except on special projects for modification. Rnwy 13-31 clsd, parked acft. (8-26)

CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Figt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft shall oper below 300' during VFR weather conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.

CAMP PENDLETON OLF (OCEANSIDE): Trans acft clear thru MCAS El Toro. (10-5)

CASTLE AFB (MERCED): Use Rnwy 12-30 only, acft parked on lndg mat. (8-31)

CONCORD-BUCHANAN ARPT: Equip. on fld. (7-15)

COSO JUNCTION ARPT: E/W Strip under const. (10-20)

DELANO-DUNLAP ARPT: Ctn: equip. on fld. (10-20)

DESERT CENTER INT FLD: Ctn, equip. on rnwys and taxiways days, resealing pavement. (9-28)

EL CENTRO NAS: Rnwy lgts 8-26 and 12-30 inop. Rnwy lgts 3-21 unreliable. (10-10)

★FAIRFIELD-SUISUN AFB-RADIO: USAF VHF/DF operates 0800-2400 daily for trng only. (10-22)

FAIRFIELD-SUISUN AFB-TOWER: USAF ILS inop until approx Nov. 14. (10-14)

FORT JONES-RADIO: Soon, rng voice fac will be comm on LF rng. Class will be: SBRAZ-DTV. Sched. bdcasts will be made simul with Montague H fac. Fac controlled from Montague INSAC. (10-14)

FRESNO-RADIO: VHF omnirng on 112.9 mc, gnd-checked only. (9-27)

★FRESNO AIR TERMINAL-TOWER: CAA ILS monitored cont. Monitored by twr 0700-2300, and by INSAC 2300-0700. (10-22)

FULLERTON ARPT: Equip. on fld. (10-20)

★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF H fac also opers on 121.5 mc. (10-10)

HAWTHORNE ARPT: Equip. on N side of Rnwy 9-27. (10-17)

HAYWARD ARPT. Const parallel to Rnwy 28. Equip. on fld days. Taxiway lgts discont. during const.(10-4)

CALIFORNIA: IMPERIAL-COUNTY ARPT: Ctn, NNW/SSE Strip under const. (10-10)
LOS ANGELES ARPT-TOWER: CAA ILS oper from temp lctn 1700' W of W end of rnwy 25L. Course aligned to center of rnwy 25L and is normal by flgt-check. Lclzr back course not usable. (7-26) FLD: Rnwys 4-22, E/W open for taxying only. Equip 1000' out on apch to Rnwys 7L, 7R. Use paved areas only. (7-26)
★MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF opers cont. (10-14)
MARCH AFB (RIVERSIDE): Inten inst trng in AT-6 acft days Mon thru Fri. Rnwy 7-25 clsd, parked acft. (9-9)
MATHER AFB (SACRAMENTO)-RADIO: USAF rng is unreliable and to be used for trng purposes only. (7-27)
McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 clsd, parked acft. (8-31)
MOFFETT NAS (MTN VIEW): Fld on positive ctl. (8-15)
MUROC AFB: Lctd within a danger area. Clsd to all trans acft except on written permission C. G., Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (8-31)
NEEDLES ARPT, SITE 25A, LAX-AMA: Exten repairs on rnwy lgts. During this period rnwy and rng lgts on rnwy under repairs will be inop. Lgts on other rnwys will oper normally. (9-19)
OAKLAND ARPT: Rnwy 6-24 rstd to lndg and take-off of lgt acft and taxying by all acft. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft lndg gravel area 27, lnd beyond white line. (10-7)
PASO ROBLES ARPT: Nov 1, lctn ident "PSR" will be effective.
PASO ROBLES-SHERWOOD ARPT: NW/SE Rnwy ruf at intsxn NE/SW Rnwy. Water standing on NW/SE Rnwy wet weather. Lnd short when using NW/SE Rnwy. (9-3)
REDDING-SKY RANCH ARPT: N/S Strip clsd, const. Use E/W Strip only. (9-27)
REEDLEY-GREAT WESTERN ARPT: 20' extreme SSE end of lndg strip very ruf. (7-29)
SACRAMENTO-RADIO: Auto. rng course monitor device temp decomm. (4-14)
★SALINAS-RADIO: VHF visual-aural rng transmitting freq of 116.1 and 111.1 mc should be deleted from this stn. (10-19) These data rcvd too late for inclusion on ANRA page.
SAN BERNARDINO ARPT: Nov 1, lctn ident "SDZ" will be effective.
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. (8-9)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (3-4)
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6)
SAN FRANCISCO ARPT-TOWER: CAA ILS lclzr unreliable daylgt hrs due to arpt const in vicinity of transmitter. (8-22) FLD: Rnwy 28L-10R comm for daylgt VFR lndgs only. (10-17) Turf area clsd. Excavations on sides of taxiway mrkd. (8-22)

PRICE-CARBON CO. ARPT: Hvy acft use center portion of rnwy and avoid hvy braking action during lndg roll and taxying turns. NNW/SSE, E/W Rnwys avail for lgt acft only. (7-13)
PROVO ARPT: Equip crossing rnwys at intsxn of diagonals, extreme ctn. Lgt acft use taxiways only. (7-13)
SALT LAKE CITY ARPT #1-TOWER: Soon a compass lctr will be comm at the site of the ILS OM operg on 239 kc, ident: "SL". Lctd 4.69 mi S on extended centerline of N/S rnwy. at lat 40-42-13, long. 111-57-43. (10-17) FLD: Trench on each side N/S Rnwy, mrkd. Shoulders soft when wet. (7-13)

UTAH: TOOELE: Demoliton of explosives being conducted in area approx 3 mi SW, Mon thru Fri each week, and will cont indefinitely. Area is bounded as follows: N bndry - lat 40-31-04; S bndry - lat 40-29-36; E bndry - long. 112-20-53; W bndry - long. 112-22-23. (3-25)

WENDOVER AFB: All mtn lgts inop. (9-30)

VERMONT: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is P. O. Box 29, Augusta State Airport, Augusta, Maine.

BURLINGTON-RADIO: LF rng on 323 kc - gnd-checked only. (10-19)

BURLINGTON ARPT: Vermont NG P-47's use NW/SE Rnwy only. 1300' E and W sides N/S Rnwy dangerous, use center. (9-7)

VIRGINIA: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is P. O. Box 1616, 625 E. Main St., Richmond 3, Va.

**ALTAVISTA ARPT: Correct lat 37-10-00, long. 79-12-30. (3-18)

BLACKSTONE AAF: Unlgtd wind sock installed near inop tetrahedron. (6-24) E/W Rnwy clsd. Ngt lgtg on N/S Rnwy only. (10-6)

CHINCOTEAGUE NAAS: White bcn opers ngts. Use rnwys, taxi strips only, soft shoulders Pilotless rdo-ctld acft operg days, Mon thru Fri. Other acft in vcnty, ctn. Red rot. bcn opers when fld clsd. It is also turned on when fld is under positive ctl for opers of rdo-ctld acft, target tows, and similar hazardous opers. (8-18)

**CHINCOTEAGUE SEAPLANE BASE #1: Correct lat 37-55-00, long. 75-22-45. (10-3)

**CHINCOTEAGUE SEAPLANE BASE #2: New Base. Lctn: 2.8 SW on Chincoteague Inlet. Lat 37-54-15, long. 75-24-30. Elev: S.L. 2 lndg lanes, longest 13,200'. Major and minor acft and engine repairs. (132-S5). Fuel: Fl. Ramp.

DAHLGREN: A Ctld Firing Area has been estab approx 18 mi ESE over the Potomac Riv for use by Dahlgren Naval Proving Grounds. Area is described as follows: Beginning at lat 38-12-20, long. 76-34-40; SW to lat 38-09-00, long. 76-37-00; WNW to lat 38-09-55, long. 76-44-00; NE to lat 38-11-10, long. 76-42-20; NNW to lat 38-13-25, long. 76-42-50; NNW to lat 38-14-40, long. 76-43-25; ESE to point of beginning. Adequate notice will be given in advance of firing activity.

DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri. Official flgts must be cleared thru one of the following: NAS: Anacostia, D. C.; Patuxent River, Md.; Norfolk, Va.; Quonset Point, R. I.; Lakehurst, N.J. CGAS: Cape May, N. J. NAF: Inyokern, Calif.; Torpedo Stn, Newport, R. I.; Naval Acft Factory, Philadelphia, Pa. MCAS: Cherry Point, N. C.; Quantico, Va. AFB: Eglin, Valpariso, Fla.; Langley, Hampton, Va.; Wright, Dayton, Ohio. Proving Ground: Aberdeen, Md. (5-5)

The importance of avoiding the Dahlgren danger area is emphasized by several near accidents recently during periods of danger area activation. Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.

EMPORIA ARPT: Bcn inop. (8-8)

FALLS CHURCH ARPT: Equip on fld. (8-15)

FRONT ROYAL-RADIO: About Nov 8, LF rng courses will be realigned as follows: SW from 26° to 330°; NE from 212° to 175°. The A and N quadrants will be reversed. (10-24)

GALAX ARPT: Equip on fld. Ctn taxying off strips. (8-8)

**GRETNA-CHATHAM-GRETNA ARPT: Correct lat 36-52-30, long. 79-17-30. (3-17)

HOPEWELL ARPT: Lndg Strip 9-27 clsd. Const. (10-18)

LANGLEY AFB (HAMPTON)-RADIO: USAF VHF/DF inop. USAF LF rng unreliable pending flgt-check. (9-10)

LANGLEY AFB (HAMPTON): Const apch ends of all rnwys. (8-31)

MOUNT VERNON: See special notice under District of Columbia.

★MT. VERNON-RADIO: Oct 18, ident FMHW fac changed from "W" to "MTV." (10-18)

NEWPORT NEWS-PATRICK HENRY: Const ENE/WSW Rnwy. Equip crossing S end NNE/SSW Rnwy. (8-8)

NORFOLK NAS (CHAMBERS FLD): Avail for lcl daylgt flgt opers only. (8-15)

PORTSMOUTH ARPT: Ctn, equip on strips, const. (9-8)

PRICE MT. BCN SITE 37, BRR-DCA: 190' drilling derrick lctd atop Price Mt. 1 mi WSW. Lgtd by clear lgts. (7-12)

QUANTICO MCAS: Eastern half of Rnwy 2-20 under const. Use extreme ctn lndg on western half. Fld clsd days, Mon thru Fri except for short periods when take-offs and lndgs permissible under hazardous conditions. (10-12)

RICHMOND-BYRD ARPT: Rnwy 6-24 clsd Mon thru Fri, between 0730 and 1730, const. Open ditches, mounds of dirt and equip alongside and ends of rnwy and connecting taxiway. Rnwy will be open during inst weather only during hrs indicated. N/S Taxiway clsd frequently between N and S center taxiways, Mon thru Fri between 0730 1730. Equip crossing taxiways. Use hard surface areas only. Grass area unsafe for taxying or parking. No fuel avail for trans mil acft. (10-18)

ROANOKE-RADIO: VHF omnirng on 114.2 mc shut down - relctn. (7-1)

ROANOKE-WOODRUM ARPT: Equip adj all rnwys. (8-8)

WASHINGTON: SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is P. O. Box 18, Boeing Field, Seattle 8, Washington.

SPECIAL NOTICE: Unmrkd p-lines extending across coves in Puget Sound area and lakes. (10-3)

**ANACORTES-ANACORTES AIR COVE SEAPLANE BASE: Lctn: 1 N on Padilla Bay. Correct lat 48-30-45, long. 122-36-30. (9-15)

BELLINGHAM-RADIO: LF rng monitor sys oper on test basis. Spurious signals may be emitted. (4-26) VHF omnirng 294° radial, which lies over Vancouver, B. C., has a usable dist of 20 mi acct course roughness at the lowest instr alt of 1500' MSL. (8-6)

BELLINGHAM ARPT: Pilots of unscheduled and scheduled acft using this fld as an alternate, must register at CAA Comms Bldg. (2-3)

BOTHELL-KENMORE ARPT: Acft parked 40' from both sides of strip. (10-6)

ELLENSBURG-RADIO: Oct 20, 1949, flgt-checked, courses correctly aligned.

**ELMA-MORTON'S ARPT: New fld. Lat 47-00-15, long. 123-23-00. (8-25)

EVERETT-PAINE FLD: N/S Rnwy clsd, const. (10-24)

ISSAQUAH, BCN SITE 1, SEA-HLN: Inop. (7-13)

METALINE FALLS-SULLIVAN ARPT: Circle fld to stop auto tfc. (1-26)

**MONTESANO-SUMMITT ARPT: Correct lat 46-59-00, long. 123-39-15. (8-25)

**MOUNT VERNON-FARMAIR ARPT: Correct lat 48-25-00, long. 122-23-30. (10-14)

**MOUNT VERNON OLF: Correct lat 48-28-15, long. 122-25-15. (10-14) Clsd to all acft except those permitted by the C. O., NAS Whidbey Island. Trng use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (3-4)

PROSSER ARPT: Gliding and soaring over fld and vcnty. Use rnwys only. (9-28)

**PROSSER-L & D SEAPLANE BASE: Delete svcg. Delete (Fl). Ramps, crash boat, haul-out. Comb oper with arpt. (9-22)

SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle, approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an inst weighing approx 1-1/2 lbs. suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (1-31)

SEATTLE-RADIO: Auto. rng monitor sys placed in oper on LF rng on exper basis. Spurious signals should be disregarded. (3-23) VHF omnirng shut down Sept 16, 1949, relctn. (9-16)

SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to strip E of main rnwy. Avoid flying over main rnwy or apchs thereto. Lgt gun signals issued on final apch. Tfc pat to E at 1000'. All turns when taxying off lgt plane strip made toward twr. Hvy acft use main rnwys, taxi strips only, making tfc pat W of fld at 1000'. Avoid flagged area E side of strip. Equip on fld. N 250' rnwy clsd, const. Temp rng lgts set at edges of rnwy 250' from N end. Usable rnwy 5550'. Const Rnwy 13-31, daylgt hrs. (10-24)

SEATTLE NAS: Single-eng acft will enter the tfc pat over Kirkland at 1000', at which point lndg instructions will be reqd from the twr. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-16)

★SEATTLE-SEATTLE TACOMA ARPT-TOWER: CAA twr transmits 119.5 mc; 245 kc; grds 3105, 4495 kc, 119.5, 122.5 mc. Transmits and grds 121.9 mc for ctl of mobile gnd tfc. Class: C(g). (10-20) FLD: Equip on fld. (10-18)

**SHELTON-GRISDALE ARPT: New fld. Lat 47-18-00, long. 123-37-45. (9-2)

★SPOKANE AFB-RADIO: USAF VHF/DF opers on 137.7, 121.5, 139.32 mc. Hrs of oper: 0800-1700 Mon-Fri for trng only. (10-14)

SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with free swinging tetrahedron. When tetrahedron points 90° to rnwy take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. (7-12)

SPOKANE-GEIGER FLD: Equip on fld. (9-27)

TACOMA: Bridge being erected across Puget Sound Narrows approx 2 mi W of city limits. Cables and temp foot bridge will stretch across Puget Sound between high banks and supporting twrs. (4-12)

WALLA WALLA-CITY CO. ARPT: Ctn, const lndg area days. (10-19)

(10-25-49)

WASHINGTON WENATCHEE: Unmrkd p-line crosses Columbia River 3 mi N of Entiat and 18 mi N of Wenatchee-Fancher Fld. Wires supported on steel twrs 100' to 800' above riv surface. (5-16)

**WESTPORT ARPT: Correct: Lat 46-54-00, long 124-06-00. (8-25)

**WHIDBEY ISLAND NAS: Stn has been designated as all weather air stn. (10-19)

WHIDBEY ISLAND NAS (AULT FLD): Ctn, remain in center rnwys. Open drainage gutters sides both rnwys. Obst area extreme apch end of Rnwy 12 and taxiways, mrkd. Ctn, const on rnwys and taxiways. (5-27)

WEST VIRGINIA SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is Kanawha County Court House, Charleston, W. Va.

CHARLESTON-KANAWHA CO. ARPT: Equip SE side Rnwy 5-23. Equip crossing Rnwy 15-33 days. Obsts mrkd day, ngt. (7-25)

PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough. (10-21)

RAVENSWOOD ARPT: NW/SE Strip clsd. (10-24)

S. PARKERSBURG-GUINN'S ARPT: E/W Strip clsd. (10-24)

WHEELING-OHIO-CO. ARPT: Lndg area under const. (10-10)

WISCONSIN SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is 638 State St., Madison 3, Wis.

CABLE UNION ARPT: Ctn, apch clearing in progress. (10-7)

GLIDDEN: Const new arpt 1 mi SE at lat 46-07-15 and long. 90-34-30. Unusable. (10-12)

GRANTSBURG-RADIO: Temporarily, scheduled bdcasts made on the hr and 30 min past the hr. Teletype service will be inaugurated at a later date. (8-2)

MADISON ARPT: Equip on fld days. Sod unsafe. (8-1)

MILWAUKEE-GENERAL MITCHELL FLD: Full length of Rnwy 13-31 open days and N from green rng lgts at ngt. Rnwy 18-36 clsd const, except 2600' N end open days only. Taxiway from Rnwy 1-19 to Rnwy 6 clsd. Rnwy 7-25 clsd, hi-tension obsts. Rnwy 9-27 not to be used at any time with wind under 8 mph except in emerg or upon demand by pilot for definite reason, or take-offs in inst weather to expedite tfc. Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Army twr lctd W side clsd and should not be confused with CAA twr lctd N side. (9-27)

NIAGARA ARPT: Const of NE/SW Strip. (8-23)

PORT WING ARPT: NE/SW Rnwy under const. (9-9)

RHINELANDER-ONEIDA ARPT: Ctn, equip on SW apch. (9-9)

WYOMING SPECIAL NOTICE: The address of the C.A.A. District Airport Engineer is Stapleton Airfield, Denver 7, Colo.

AFTON ARPT: Deep irrigation ditch runs entire W side of strip. Strip varies in width from 70 to 100'. Extreme ctn. (8-7)

★CASPER AFB-RADIO: Mil Awys Stn discont. USAF ctl twr discont. (10-18) VHF omnirng courses between 10° and 35° from stn not flyable at minimum instrument alt beyond 35 mi. (10-11)

CASPER ARPT: Rnwy lgts on Rnwys 2, 5 inop. (9-20)

DULL CENTER-SHERWIN # 1 ARPT: Irrigation intermittently during summer months and 5" pipe may be across center of strips. When soft or obstd, will be mrkd, then use Sherwin Arpt #2. (3-31)

LARAMIE-RADIO: LF rng course monitor. device decomm. (10-18)

RAWLINS ARPT: Use new ENE/WSW and N/S Strips only. (8-15)

SHERIDAN CO. ARPT: N/S Rnwy clsd to acft heavier than DC-3. (7-8)

DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, COMPULSORY REPORTING POINTS, CONTROL AREAS, CONTROL AREA EXTENSIONS, AND CONTROL ZONES: Effective November 15, 1949, unless otherwise advised, Civil Airways, Compulsory Reporting Points, Control Areas, Control Area Extensions, and Control Zones will be amended to read in whole or in part as follows:

AIRWAYS: (1) Red Airway No. 21 (Pittsburgh, Pa., to Boston, Mass.) Pittsburgh, Pa.; the intxn of the NE course of Pittsburgh, Pa., and the N course of Altoona, Pa.; to Selingsgrove, Pa. non-directional radiobeacon. From the intxn of the SE course of Wilkes-Barre, Pa. and the W course of Newark, N.J. . .

(2) Red Airway No. 46 (Aberdeen, S.D., to Rochester, Minn.). From Aberdeen, S.D. to Watertown, S.D. From the intersection of a direct line between Stanton, Minn., non-directional radio beacon and the Mason City, Iowa, non-directional radio beacon with the W course of Rochester, Minn. to Rochester, Minn.

(3) Add: Red Airway No. 86 (Millinocket, Me., to Houlton, Me.). From the intxn of the NE course of Millinocket, Me. and the NW course of Houlton, Me., to Houlton, Me. range station, excluding that portion outside the continental limits of the United States.

(4) Blue Airway No. 13 (Houston, Tex., to Minneapolis, Minn.). . . Shreveport, La. radio range; the intersection of the NW course of Shreveport, La. and the S course of Texarkana, Ark.; Texarkana, Ark. range station; Fort Smith, Ark., non-directional radio beacon; Joplin, Mo., range station. . .

(5) Blue Airway No. 17 (Bangor, Me., to Presque Isle, Me.). From the intxn of the NE course of Bangor, Me. and the S course of Houlton, Me., via Houlton, Me. range station; the intxn of the N course of Houlton, Me., and the SE course of Presque Isle, Me., to Presque Isle, Me. range station, excluding that portion outside the continental limits of the U. S.

(6) Blue Airway No. 22 (Memphis, Tenn., to Wichita, Kans.). . . Little Rock, Ark., range station; Ft. Smith, Ark., VOR range sta; Tulsa, Okla. range station. . .

(7) Blue Airway No. 34 (Little Rock, Ark., to Tulsa, Okla). REVOKED.

COMPULSORY REPORTING POINTS: (1) Green Airway No. 3 (San Francisco, Calif., to New York, N.Y.). . . Allentown, Pa. range station; the intxn of the E course of Allentown, Pa. and the SW course of New York (La Guardia), N.Y.; the intxn of the SW course of New York (La Guardia) and the NW course of Floyd Bennett, N.Y... .

(2) Red Airway No. 46 (Aberdeen, S.D., to Rochester, Minn.) CAPTION CHANGE.

(3) Add: Red Airway No. 86 (Millinocket, Me., to Houlton, Me.). No reporting point designation.

(4) Blue Airway No. 17 (Bangor, Me., to Presque Isle, Me.) CAPTION CHANGE.

CONTROL AREAS: Red Airway No. 46 (Aberdeen, S.D., to Rochester, Minn.) CAPTION CHANGE.

(2) Add: Red Airway No. 86 (Millinocket, Me., to Houlton, Me.). All of Red Airway No. 86.

(3) Blue Airway No. 13 (Houston, Tex., to Minneapolis, Minn.). . . Shreveport, La., range station to the intxn of the NW course of Shreveport, La. and the S course of Texarkana, Ark., via Texarkana, Ark. range station. . .

(4) Blue Airway No. 17 (Bangor, Me., to Presque Isle, Me.) CAPTION CHANGE.

(5) Blue Airway No. 34 (Little Rock, Ark., to Tulsa, Okla.) REVOKED.

CONTROL AREA EXTENSIONS: (1) SYRACUSE, N.Y. - REVOKED.

(2) HOULTON, ME. - REVOKED.

CONTROL ZONES: (1) Add: NOME, ALASKA: Within a 5 mile radius of Mark AFB.

(2) DETROIT, MICH.: Within a 5 mile radius of Detroit-Wayne Major Airport and within a 6 mile radius of Willow Run Airport, Ypsilanti, Michigan.

(3) SOUTH BEND, IND.: Within a 5 mile radius of Bendix Airport, South Bend, Ind., extending 2 miles either side of the W course of South Bend to New Carlisle fan marker.

(4) Add: KODIAK, ALASKA: Within a 5 mile radius of the Kodiak Naval Air Base, Kodiak, Alaska, extending 2 miles either side of the SW course of Kodiak range to Kodiak range station.

DANGER AREA DESIGNATIONS: The following Danger Area amendment will be effective November 10, 1949, unless otherwise advised:

AMENDMENT NO. 16

(1) The TRONA, CALIF., area is amended to read: Location: Trona (Los Angeles Chart); Description: Beginning at lat 35-47-46N, long. 116-55-20W; due S to lat. 35-15-56N; due W to long. 117-16-52W; due N to lat. 35-25-00N; due W to long. 117-26-00W; due N to lat. 35-36-00N; due E to long. 117-16-52W; due N to lat. 35-47-46N; due E to lat. 35-47-46N, long. 116-55-20W, point of beginning; Altitudes: Unlimited; Time: Daylight and darkness, Monday through Friday; Using Agency: 12th Naval District, San Francisco, California.

(2) A LAKE ONTARIO (WILSON), N.Y., area is added to read: Location: Lake Ontario (Wilson) (Detroit Chart); Description: Beginning at lat 43-20-00N, long. 78-51-30W; due S to lat. 43-18-40N; W to lat. 43-18-30N, long. 78-54-00W; NW to lat 43-20-00N, long. 78-55-00W due E to lat. 43-20-00N, long. 78-51-30W, point of beginning; Altitudes: Surface to 2000 ft.; Time: Daylight hours only, from Nov. 4 to December 1, 1949; Using Agency: Cornell Aeronautical Laboratory, Inc., Buffalo, New York.

(3) The COULEE DAM, WASH., area is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at Tonasket, Wash.; thence direct to Colville, Wash.; due S to lat. 47-57-00N, long. 117-54-00W; due W to long. 118-20-00W; due S to lat 47-46-00N; thence on a direct line to Entiat, Wash.; northeasterly along the Columbia River to its junction with the Okanogan River; northerly along the Okanogan River to Tonasket, Wash., point of beginning". (10-25-49)

WANT TO BE SURE ABOUT THAT ATC CLEARANCE?

The CAA uses symbols and abbreviations[1] in copying clearances. It is believed that they may be used to advantage by pilots and other personnel receiving air traffic control clearances. Accordingly, they are listed below for those who care to adopt them in copying clearances..

1.	C	ATC CLEARS
2.	R	RANGE
3.	Z	TOWER
4.	A	AIRPORT
5.	↓	DESCEND TO (Altitude) IMMEDIATELY
6.	↑	CLIMB TO (Altitude) IMMEDIATELY
7.	→	CRUISE
8.	X	CROSS
9.	M	MAINTAIN
10.	H-NE	HOLD (Direction from fix).
11.	$\frac{.5}{\oplus}$ or $\frac{.5}{H}$ or $\frac{.5}{K}$ or $\frac{.5}{F}$	MAINTAIN 500 ABOVE ALL CLOUDS OR HAZE OR SMOKE OR FOG
12.	R.	REPORT IMMEDIATELY ON LEAVING (Specified Altitude Level or Levels)
13.	RR	REPORT IMMEDIATELY ON REACHING (Specified Altitude Level or Levels)
14.	LT	TURN LEFT AFTER TAKE-OFF
15.	RT	TURN RIGHT AFTER TAKE-OFF
16.	RS	RIGHT SIDE
17.	LS	LEFT SIDE
18.	EAC	EXPECT APPROACH CLEARANCE AT (Specified Time)
19.	Λ or NO DLA	NO DELAY EXPECTED
20.	DLA INDFT (TIME)	DELAY INDEFINITE EXPECT APPROACH CLEARANCE NOT LATER THAN (Specified Time).
21.	UFA	UNTIL FURTHER ADVISED
22.	APC	APPROACH CONTROL

[1]Where the symbols and abbreviations are not sufficient to copy the complete message, use plain language so that no misunderstanding of the message will occur.

****

NOTE: Detach for ready reference.

AIRMAN'S GUIDE

CHECK THE DIRECTORY OF AIRPORTS

All abandoned airports; or those reported abandoned; or airports closed because of construction, lack of maintenance, or litigation; are cited as such in only the Directory of Airports. If there is an outstanding NOTAM on a field, a "+" in the remarks column of the Directory of Airports will so indicate. This NOTAM or additional data is cited in full in the Notices to Airmen section.

SPECIAL NOTICE

YOUR VFR FLIGHT PLAN IS TRANSMITTED - Before taking off on a VFR cross-country, advise your destination airport you are coming by filing a flight plan with the nearest CAA Airway Communications Station. This station will transmit the flight plan to the communications station at your destination.

You can file the flight plan in person, by telephone, or by radio. Because of radio congestion, however, the CAA requests that you normally file in person or by telephone.

The CAA offers this VFR flight plan transmission service primarily to promote safety by continually and accurately accounting for your aircraft. Thus, if you have two-way radio, you may report to each communications station over which you pass, in addition to advising the communications station at your destination of your arrival.

If you have filed a flight plan, immediately notify the nearest CAA Airway Communications Station when you land. If you don't, an unwarranted and expensive search and rescue procedure will be inaugurated. So, while the CAA encourages you to file a flight plan, you should assure the flight plan service's effectiveness by being sure to close your flight plan after landing.

DIRECTORY OF AIRPORTS

RADIO FACILITY DATA

NOTICES TO AIRMEN

VOL. 4, NO. 17 . . . NOVEMBER 7, 1949

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 121.5 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

NOTE: AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS, or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

AIR NAVIGATION RADIO AIDS

VHF RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly. NOTE: See "VOR Use" page 5.1.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category I are met. NOTE: Category II indicates by parenthetical (2). Category III= Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE; Category III indicated by parenthetical (3)

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900.
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue hemisphere; (Y) = Yellow hemisphere
→ = New or revised data.

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual; "A" or "N", aural. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC . . . Approach Control Tower, CAA
B . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C . . . Control Tower, CAA
CA . . Control Tower, Air Force
CI . . . Control Tower (City, County, Private, etc.)
CN . . . Control Tower, Navy
D . . . Distantly controlled
FM . . VHF fan marker (100 watts)
GCA . . . Ground Controlled approach system
H . . . . Non-directional radio beacon (homing), power 50 watts or more
ILS . . Instrument Landing System (voice on localizer channel)
IM . . . VHF boundary marker
L . . . . L/MF (200 - 415 kc) voice facility on other than range frequency.
LFM . . . VHF fan marker, low powered (5 watts, not over 10 miles from range.
MH . . Non-directional radio beacon (homing) power less than 50 watts
ML . . Range (loop radiators), power less than 50 watts
MM . . VHF middle marker
MMK . . Compass locator station when combined with middle marker of ILS.
MOR . . . Low frequency omni-directional range.
MRA . . . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts.
MRL . . Range (loop radiators), power 50 or more, but less than 150 watts.
OM . . . VHF outer marker
OMK . . Compass locator when installed at outer marker site or within 5.5 miles of middle marke
P . . . Point-to-Point radio
RA . . Range (adcock, vertical radiators), power 150 watts or more.
RL . . . Range (loop radiators), power 150 watts or more.
S . . . Simultaneous (range signals and voice) type of transmitter.
T . . . Teletype
TX . . Principal teletype
V . . . Additional VHF voice feature on other than range frequency.
VAR . . Visual-aural VHF range
VOR . . . Visual omni-directional VHF range
W . . . . Without voice facilities
Z . . . . VHF station location marker at a range station

(1) All C.A.A. communication stations guard 3105,4495,3117.5 (where no tower)kc;122.1,126.7,140.58 mc, except in a few isolated cases. C.A.A. communication stations on domestic international aerodromes, in addition to the above, guard 6210 kc.
(2) All C.A.A. towers guard 3105,4495 kc; 3117.5 (within 10 min prior req) kc; 122.5 mc. In addition some guard 126.18 mc.
(3) Caution: Navy towers generally operate daylight hours only.
(4) The new two-way international emergency frequency, 121.5 mc, has been commissioned at many towers and communication stations. All C.A.A. towers and communication stations will be using this frequency by approximately September 1, 1950.
(5) Range courses are magnetic in-bearings.

****
*Pilots are requested to indicate when calling C.A.A. airway communications *
*stations and control towers the channel or frequency on which the station *
*reply is expected. *
